TTLS	604	893	67.6	8403	9.4	88	16	175.6	77	245	3.2	5

Strengths: Has quick release with great accuracy. Plays well under pressure. Gets the ball to all of his playmakers and has the ability to hit them in stride before they make their breaks. Respected leader and makes excellent decisions evidence of his career 88-16 ratio.

Weaknesses: Injury concerns after suffering two shoulder injuries his junior season. Played mostly out of the shotgun in a spread offense and will have to adjust his reads. Needs to feel the rush better and protect his body from contact.

Overall: Bradford answered some questions about his frame when he checked in at 236 lbs at the combine and will easily be a Top 10 pick probably going no lower than 4th to the Redskins. While he will need a season or two to adjust completely to the pro-style offense, Bradford has all the tools to become a franchise QB.

TTLS	695	1110	62.6	8148	7.3	60	27	137.2	175	318	1.8	5

Strengths: Played in a pro style offense. Showed toughness playing through injuries and played well under pressure in close games last year. Improved accuracy and decision-making significantly his junior season.

Weaknesses: Questions have arose about his maturity level and many teams may be leery of his attitude. Played with very talented receivers and a lot of his production came from his receivers making big plays in jump ball situations.

Overall: While Clausen's mental maturity may be in question, his physical tools matured over his 3 years in South Bend (gained 35 lbs) and he improved his TD-INT ratio from 32-23 his first two years to a 28-4 ratio his junior season. Clausen may fall outside the Top 10 but he is a certain 1st rounder and could develop into a reliable starter at the next level.

#3 Colt McCoy

TTLS	1157	1645	70.3	13253	8.1	112	45	155	447	2260	5.1	20

Strengths: Very experienced and finished his career as the winningest QB in NCAA history. His career 70.3% completion rate details his great accuracy in the short to intermediate range. Has decent release and knows where to go with the ball.

Weaknesses: Size maybe a factor at only 6'1. Struggled vs consistent pressure (127 yds vs Oklahoma, 3 INT vs Nebraska his senior year) Sometimes does not go through all of progressions which leads to balls being batted down at the line.

Overall: McCoy will likely get drafted in the 2nd-3rd round by a team that runs the West Coast offense. McCoy will have to overcome his size and use his experience to become a starter in the NFL.

TTLS	661	995	66.4	9285	9.3	88	16	170.8	692	3360	4.9	57	

Strengths: Great leader and competitor. Clutch performer and showed the ability to play with pain. Good athleticism for his size. Can still get the ball down the field while rolling out of the pocket. Very rarely puts the ball in a bad spot where defenders can get their hands on it.

Weaknesses: Needs a lot of work on his mechanics and delivery to become an NFL quality passer. Throws flat-footed too often and his needs to improve his ball placement as his throws are often low for his receivers. Will have to quicken his delivery and be able to make progressions faster. Often keys onto just one receiver.

Overall: Tebow is going to have to work very hard on his mechanics especially his delivery and get used to being under center after playing 4 years in Urban Meyer's offense. It's the same offense that San Francisco QB Alex Smith played in and he has struggled mightily adjusting to the next level. While Tebow's character and determination are second to none, he's got a lot of improvement to make if he's going to be a consistent starting QB in the NFL. However, because of those intangibles, he will likely get drafted in the 2nd-3rd round.

#5 Tony Pike

TTLS	421	682	61.7	5018	7.4	49	20	141.4	94	344	3.7	3	

Strengths: : Is able to fit the ball into tight spots especially the deep out routes. Is very good at leading receivers on slant routes. He is surprisingly quick and can move out of the pocket with ease. Does a great job of avoiding the rush and consistently dumps the ball off to the safety valve.

Weaknesses: Despite gaining 12 lbs already, Pike still has a weak frame and will have to continue to put on weight. Suffered several injuries in college so durability is a ? mark. Will need to work on mechanics and footwork especially stepping up in the pocket instead of rolling out all the time like he did in college.

Overall: Pike went from 4th-5th string on the Bearcat depth chart to a top 100 draft pick in just over a year. While he will probably need a year to add weight to his frame and improve his mechanics, Pike can become a consistent starter at the next level.

TTLS	1171	1763	66.4	12905	7.3	102	36	142.9	671	3589	5.3	45

Strengths: Showed good athletic ability and mobility. Avoids pressure in the pocket well and has good strength to shake free from sacks. Has decent arm strength and shows good ability to read defenses at the line.

Weaknesses: Will have to adjust to being under center at the next level and improve his mechanics especially his release. His footwork is going to have to be worked on as he often throws off his back foot. Several scouts questioned his overall competitiveness when he decided not to throw at the combine after most of the top QBs were unable to perform passing drills because of injury.

Overall: LeFevour had an outstanding college career finishing #2 all-time in total yards and #1 in total TDs. However, he played in a spread style offense and will have to adjust to being under center. He probably will need at least a year to adjust and his decision not to throw at the combine will probably drop him to the 3rd-4th round.

TTLS	268	421	63.7	2983	7.1	16	13	129.5	234	1458	6.2	13

Strengths: Very good athlete evidence of his impressive 4.54 40 time he ran at the combine. Can make big plays down the field especially when scrambling out of the pocket. Has big arm and has the strength to complete all the NFL throws.

Weaknesses: Will have to improve his footwork and mechanics. Also at times was very inconsistent in his accuracy. He will also have to adjust to a pro style offense and be able to make his reads much quicker.

Overall: Brown only had 1 full season as a starter after playing behind Pat White for 4 years. Right now he is a better athlete than QB and will need to be coached up. Coming into Senior Bowl week, Brown was a 6th-7th round pick at best, but after his impressive performance throughout the week followed by a good combine workout, Brown is moving up draft boards and will be selected in the 4th round range. However, he does have a lot of work to do to become a starter at the next level.

TTLS	401	727	55.2	5765	7.9	48	35	133.9	136	520	3.8	7	

Strengths: Has the ability to make all the throws at the next level and can fit the ball in tight spots down the field. Can get rid of the ball very quickly and showed the ability to make accurate throws after stepping up in the pocket.

Weaknesses: Very very inconsistent passer evidence of his 20 interceptions he threw last season. There a several questions about his throwing motion as he tends to sidearm it on occasion. Many times last season he stared down his primary receiver, which led to DBs making plays on the ball. When faced with pressure, he often didn't follow thru on his throwing motion.

Overall: Snead has the talent and all the physical tools to become a good NFL starting QB. However, he will have to significantly improve his decision-making and improve his throwing motion. Snead made a big mistake coming out early and he could have used another year at Mississippi to improve his draft stock. Snead will get drafted somewhere in the 4th-5th round because of his ability but he could have been a 1st-2nd round pick next year if he would have stayed in school and improved.

TTLS	768	1180	65.1	10392	8.8	74	33	154.2	755	5008	6.6	65	

Strengths: Great athlete that has the speed and elusiveness to make plays at any level. Despite his size, he stood tough in the pocket and is not afraid to take a hit. Showed good accuracy on short to intermediate routes and can be very accurate when throwing on the move. Was able to perform at a high level many times during clutch situations (Michigan '07, '07 and '08 FCS champ games)

Weaknesses: Lacks the ideal size and strength of a typical NFL QB. Will have to improve his mechanics and footwork and adjust to a completely different offense at the next level. Didn't see a lot of elite competition in college and lacks the arm strength to be accurate on deep throws.

Overall: Edwards is an interesting prospect that will probably end up at the slot position in the NFL. He has drawn a lot of comparisons to Hines Ward and Antwan Randle El who both played QB in college and developed into fine receivers. If he gets moved to the slot, Edwards will have to improve his strength. While he probably won't play QB in the league, teams will be looking to draft Edwards somewhere in the 5th-6th round to take advantage of his overall athletic ability.

TTLS	408	637	64.1	4265	6.7	19	20	123.9	268	1241	4.6	11

Strengths: Has good size and showed willingness to stand tall in the pocket. Showed good mobility and has a nice delivery. Can avoid the rush and buy extra time with his feet.

Weaknesses: Has a history of battling injuries (hamstring) and because of those injuries only played a full year in college. He will also need to improve his arm strength and ability to read varying defenses.

Overall: Kafka has the toughness and the intelligence to make an NFL roster this year but he will find it tough in becoming an NFL starter. If he goes to the right situation Kafka can become a quality NFL backup and expect some team to pick him up around the 6th round.

TTLS	552	861	64.1	5970	6.9	38	26	130.9	93	106	1.1	3

Strengths: Has good size and footwork and showed good accuracy on underneath passes. Has good fundamentals and mechanics and can put great touch on the ball. Uses good judgment both pre and post snap.

Weaknesses: : Did not show good arm strength when throwing out patterns down the field in college or at the combine workouts. Lacks the mobility to step away from pressure. Has had shoulder injuries in the past and worked primarily out of the shotgun in college. He will also have to quicken his release.

Overall: Canfield had a great senior season for the Beavers and was projected to be a 5th-6th round pick right after the season. However after a poor performance at the combine, Canfield will probably fall to the 7th round. If Canfield has aspirations of becoming an NFL starter someday he will have to improve his arm strength and become quicker with his release and reads. Realistically, Canfield will be a backup at the next level.

Strengths: Very experienced player and showed good accuracy on short to intermediate routes throughout his college career. Very effective at managing a game and usually makes good decisions with the ball.

Weaknesses: Not very athletic and has trouble escaping the pocket when feeling inside pressure. Played in a simplified offense. Suffered some injuries and durability is a ? mark.

Overall: Hiller had an outstanding career at Western Michigan and will be a good fit in a West Coast offense system. However, his limited mobility and injury concerns will make him a 7th round pick at best. Hiller will probably have to settle for being an NFL backup.

Strengths: Plays with great competitiveness and has surprisingly good athletic ability and quickness. Showed courage in the pocket and is not afraid to take a hit. Can be very accurate on deep fade routes and has the strength to make all the NFL throws.

Weaknesses: Was inconsistent with his footwork and passing mechanics. Right now he is probably a better overall athlete than QB. Can lock into his primary receivers which gives DBs a chance to make a play on the ball. Is really going to have to improve his ability to read defenses.

Overall: Robinson had a fine career at Oklahoma St and possesses many tools of a typical NFL QB. However, he will need a lot of work in the passing game. * Richmond

Strengths: Has good size and a nice frame. Showed good ability to make plays with his feet. Can get rid the ball very quickly and has solid arm strength. Can hit all the short to intermediate routes and shows good accuracy with pressure in his face.

Weaknesses: : He tends to take more sacks than he needs to and has to work on his deep passes especially putting more zip on the ball. Took a lot of big hits in college and has to improve his pocket awareness.

Overall: There are varying opinions on Brown from NFL scouts. Some think he will need time to adjust coming from a spread offense, while others like his quick release and his arm strength and think his adjustment will be easier. Overall, he could end up in the 5th-6th round or go undrafted. Realistically, he will probably end up as a quality backup at the next level.

TTLS	348	629	55.3	4187	6.7	36	22	123.1	101	253	2.5	3

Strengths: Shows good arm strength and can make all the throws at the next level. Can put the ball on the money in tight spots especially on quick slant passes. Played in a pro-style offense his senior season. Has quick delivery and gets rid of the ball fast. Has decent mobility and can get out of the pocket.

Weaknesses: Didn't show consistency and accuracy until mid way thru his senior season. Sometimes can be stiff in the pocket and can stare down his receivers. Is often late at getting rid of the ball when facing pressure and takes the big hit too often.

Overall: Crompton showed considerable improvement his senior season and has a lot of upside. Before the season, Crompton wasn't even among the Top 30 QBs on most draft boards but has been rising as of late. With good coaching, Crompton can eventually become a starter in the league some day, but will have to continue his improvement in all phases of his game.

1ST ROUND MOCK DRAFT (MARCH 10TH)

	Team	Position	Name	School	Needs
1	ST LOUIS	QB	SAM BRADFORD	OKLAHOMA	QB, WR, DT, CB
	This pick is based on Bradford easing worries about his arm with his Pro Day on 3/25. He is the only consensus franchise QB & bringing in AJ Feeley in FA allows him to learn from a West Coast QB & let someone else take the beating behind a bad OL				
2	DETROIT	DT	NDAMUKONG SUH	NEBRASKA	DT, OLB, CB, RB
	Combined with the recent FA additions to the DL the drafting of Suh would turn a major weakness from LY into a strength here. Suh would be the Haynesworth for Schwartz & the Lions can get an OT in the 2nd RD.				
3	TAMPA BAY	FS	ERIC BERRY	TENNESSEE	DT, CB, WR, S
	Berry had the luxury of learning the Tampa-2 from former TB & Tenn DC Kiffin LY. He has all the skills necessary to walk onto the field as a starter & is very versatile.				
4	WASHINGTON	OT	RUSSELL OKUNG	OK ST	LT, QB, DE, WR
	The Redskins new commonsense approach under GM Bruce Allen isn't a real big surprise. Both he & Shanahan know the foundation of a solid team begins up front & Okung replaces the retired Pro Bowler Chris Samuels immediately.				
5	KANSAS CITY	OT	BRYAN BULAGA	IOWA	LT, WR, TE, ILB
	The Chiefs have a slew of needs but by taking Bulaga they shift Branden Albert to RT & give Matt Cassell some semblance of protection. Iowa HC Ferentz is a good friend of the staff & front office & will know Bulaga can fit right now.				
6	SEATTLE	DT	GERALD MCCOY	OKLAHOMA	LT, RB, QB, DT
	Seattle has a major need at LT but with McCoy sliding they get a solid value here. Pete Carroll knows the defensive strength is at LB & by taking McCoy he improves them & look at upgrading other spots with the #14 pick.				
7	CLEVELAND	CB	JOE HADEN	FLORIDA	QB, CB, ILB, S
	The Browns will try hard to trade up for Bradford & Berry would be an ideal fit for them as well. Haden's disappointing 40 yd dash was more a function of bad technique & not a lack of speed & remains the best CB in the draft.				
8	OAKLAND	OT	BRUCE CAMPBELL	MARYLAND	LT, DT, OLB, OG, C
	Cable is an OL coach by trade & while Campbell didn't merit a single vote for ACC All-Conf team by anyone he has the measurables that the Raiders crave. While he is a bit raw he can develop into a starting LT.				
9	BUFFALO	LT	TRENT WILLIAMS	OKLAHOMA	LT, NT, ILB, OG
	The Bills OL was devastated by injuries in 2009 & were down to their 3rd string OT's. While the defense is switching to a 3-4 the OL needs more help and Chan Gailey can focus on the run game to rebuild the team.				
10	JACKSONVILLE	DE	DERRICK MORGAN	GEORGIA TECH	DE, OLB, S, WR
	The Jaguars only had 14 sacks LY & Del Rio was very close to being released after going 1-4 in DEC. WR will be debated intensely here but they need to fix the mistakes from the 2008 Draft in DE's Groves & Harvey.				
11	DENVER	WR	DEZ BRYANT	OKLAHOMA ST	OLB, QB, CTR, WR
	Denver fully expects to trade Marshall and will replace talent with talent here. McDaniels is fully aware of Bryant's issues and will have the leadership on hand to fix that.				

1ST ROUND MOCK DRAFT (MARCH 10TH)

	Team	Position	Name	School	Needs
12	MIAMI	NT	DAN WILLIAMS	TENNESSEE	NT, OLB, S, WR

The Dolphins have a glaring need to pick up a WR to develop with Henne & Ga Tech's Thomas will get serious consideration. However the suspension of NT Ferguson leaves a huge hole & Williams is a natural 3-4 NT to inject into the defense.

13	SAN FRANCISCO	OT	ANTHONY DAVIS	RUTGERS	RT, S, OLB, CB
----	---------------	----	---------------	---------	----------------

SF wanted to draft a RT in 2009 but Crabtree was too good to pass up. They can draft Davis, improve the run game & protection for the spread offense & use 2010 to decide if Staley should slide to RT in 2011.

14	SEATTLE	RB	CJ SPILLER	CLEMSON	LT, RB, QB, DE
----	---------	----	------------	---------	----------------

This pick is the Seahawks wild card & they will dangle it out for trade. They could reach a bit for former USC OT Brown here but Carroll stays put & adds speed into his offense with the best RB in the draft.

15	NY GIANTS	MLB	ROLANDO MCCLAIN	ALABAMA	ILB, OG, CB, QB
----	-----------	-----	-----------------	---------	-----------------

The Giants defense was highly rated prior to 2009 but injuries, age & a DC the players didn't buy into contributed to the team giving up 85 points in its L2 games. McClain is a solid run stuffing presence who is the best player available at the Giants positions of need.

16	TENNESSEE	OLB	SEAN WEATHERSPOON	MISSOURI	DE, WLB, WR, DT
----	-----------	-----	-------------------	----------	-----------------

TEN's defense is entering a rebuilding stage on the front 7 at this point & Weatherspoon is an ideal fit to replace Keith Bulluck. Witherspoon has the production (400+ tackles), athleticism (775 full squat) & football IQ to make an instant impact here.

17	SAN FRANCISCO	S	TAYLOR MAYS	USC	S, CB, OLB, RB
----	---------------	---	-------------	-----	----------------

Mays had an outstanding combine & was tracked as low as 4.24 on his 40. He can be exposed a bit in space in coverage but he has the athleticism to fit right in with Singletary's defense.

18	PITTSBURGH	OG/OT	MIKE IUPATI	IDAHO	OG, CB, DT, DE
----	------------	-------	-------------	-------	----------------

PIT has struggled with its power run game the L2Y & Roethlisberger takes too many unnecessary chances holding onto the ball. They also need to upgrade at CB but Iupati's nasty streak & versatility is an ideal fit for the Steelers.

19	ATLANTA	CB	PATRICK ROBINSON	FLORIDA ST	CB, DE, OG, LB
----	---------	----	------------------	------------	----------------

While the Falcons did pay a lot for Dunta Robinson they are competing with the Saints for the NFC South. Robinson is a solid player with good size who won't be intimidated by the Saints passing threats.

20	HOUSTON	CB/S	EARL THOMAS	TEXAS	CB, RB, DT, CB
----	---------	------	-------------	-------	----------------

The Texans have a huge hole in the secondary with Robinson departing. They can satisfy their RB needs in the 2nd RD but they need to stock up in the back 4 if they ever hope to beat the Colts.

21	CINCINNATI	WR	GOLDEN TATE	NOTRE DAME	WR, TE, DT, S
----	------------	----	-------------	------------	---------------

Despite upgrading the #2 WR spot with Antonio Bryant the Bengals still need to upgrade the slot WR position. Tate is electric with the ball, had a better than expected combine and isn't an off the field distraction.

22	NEW ENGLAND	OLB	BRANDON GRAHAM	MICHIGAN	OLB, RB, WR, OG
----	-------------	-----	----------------	----------	-----------------

Graham is a natural fit in the Patriots scheme & can play inside or outside. The lack of a pass rush forced Belichick to take chances he normally wouldn't (IND) in 2009 & with 3 2nd RD DC's he can upgrade the OL & RB positions.

1ST ROUND MOCK DRAFT (MARCH 10TH)

	Team	Position	Name	School	Needs
23	GREEN BAY	OT	CHARLES BROWN	USC	RT, CB, OG, P
	GB resigned Clifton to what is essentially a 1 year deal loaded with incentives. Brown will come in & take the RT spot in 2010 & shift to LT next year.				
24	PHILADELPHIA	OLB	SERGIO KINDLE	TEXAS	LB, DE, OG, CB
	The Eagles have struggled for years to put together a solid LB corps. Kindle will allow the defense to stay unpredictable in its blitz schemes & shore up the defense vs bigger RB's.				
25	BALTIMORE	CB	KYLE WILSON	BOISE ST	CB, WR, TE, DE
	BAL added Boldin for 3rd & 4th RD DC's & we expect Mason to resign. The Ravens are now free to address their biggest need in secondary depth. Wilson has a chance to be the #2 CB in 2010 on opening day.				
26	ARIZONA	DE/OLB	JASON PIERRE-PAUL	USF	LB, DE, FS, QB
	Pierre-Paul is a high risk/high reward prospect with just 1 year of 1-A football & has 6.5 sacks. He is very athletic with lots of upside & Whisenhunt needs to address the OLB position here.				
27	DALLAS	WR	DEMARYIUS THOMAS	GEORGIA TECH	FS, WR, OT, NT
	Thomas posted a 19.5 ypc in an option offense & has been quietly compared to Calvin Johnson. A broken foot is keeping him from working out for teams but by picking him up here the Cowboys can move on from the Roy Williams mistake.				
28	SAN DIEGO	DT	BRIAN PRICE	UCLA	RB, DT, CB, DE
	The Chargers run defense struggled to replace NT Jamal Williams (now with DEN) allowing 118 ypg (4.5). Price gives them the big body to anchor the front 7 & they can address their RB issues in the 2nd RD though Fresno St Ryan Matthews will be tempting.				
29	NY JETS	DE	EVERSON GRIFFEN	USC	DE, RB, WR, FS
	Griffen can fit any of the 3-4 LB spots & can handle the 3-4 rush DE spot. The Jets value versatility & the team needs to add some youth in the front 7 though Golden Tate is also a consideration.				
30	MINNESOTA	DT	JARED ODRICK	PENN ST	CB, FS, DT, RB
	Odrick gives the team protection in case Pat Williams retires or is suspended along with Kevin Williams. This is a rare chance for a team to replenish a strength with a player who would go much higher in other years.				
31	INDIANAPOLIS	C	MAURKICE PONCEY	FLORIDA	OG, CTR, DT, CB
	GM Bill Polian placed the Super Bowl loss at the feet of the OL & the team needs to start thinking about replacing Ctr Saturday. IND released OG Ryan Lilja & Pouncey can learn the system on the go as a rookie.				
32	NEW ORLEANS	DE	CARLOS DUNLAP	FLORIDA	OLB, DE, FS, TE
	The Saints need to replace Charles Grant at DE & give them more of a pass rushing presence. Dunlap has a bit of risk about him & the team may consider Jermaine Gresham as Shockey has health issues.

#1 Clifford "CJ" Spiller
 Clemson
 Height: 5'11 • Weight: 195
 40 Time: 4.37

CAREER STATISTICS

Year	Rushing				Receiving			
	Att	Yds	Avg	TD	Rec	Yds	Avg	TD
2006	129	938	7.3	10	19	210	11.1	2
2007	145	768	5.3	3	34	271	8.0	2

TTLS	606	3547	5.9	32	123	1420	11.5	11

Strengths: Is a threat to score every time he touches the ball running, receiving or returning kicks. Uses a "jump" cut to explode past defenders and leaves them in his tracks. Has great speed and strength and shows good agility and balance. Is a decent receiver out of the backfield especially when matched up one-on-one down the sideline or in the slot. Excellent vision and has the ability to anticipate where the hole is going to be.

Weaknesses: Is prone to taking big hits with his upright running style. Has to improve his pass blocking technique and be more active. Durability is a question as he suffered from nagging injuries throughout his career and shared the workload until his senior season.

Overall: Spiller clearly is the best RB in this year's draft and has all the tools to become a playmaker at the next level. His versatility as a returner and pass catcher out of the backfield will allow him to make an immediate impact as a rookie. Spiller maybe one of the best talents in the draft and will be drafted in the top 20.

RUNNING BACKS RANKINGS

#2 Ryan Matthews
 Fresno St
 Height: 5'10 • Weight: 220
 40 Time: 4.45

CAREER STATISTICS

Year	Rushing				Receiving			
	Att	Yds	Avg	TD	Rec	Yds	Avg	TD
2007	145	866	6	14	0	0	0	0
2008	113	606	5.4	6	8	146	18.3	2
2009	276	1808	6.6	19	11	122	11.1	0
TTLS	534	3280	6.1	39	19	268	14.1	2

Strengths: Powerful downhill runner that initiates contact on defenders. Picked up a lot of extra yards by falling forward. Pass blocks with an attitude to punish defenders. Squares his shoulders and uses them well both running and blocking.

Weaknesses: Limited pass catching experience (19 career rec). Lacks explosiveness and top end speed. Missed games every year due to injuries. Does not possess the elusiveness to make defenders miss.

Overall: Mathews had an outstanding junior season with 1808 yds (6.1) while playing in the same backfield as other top prospect Lonyae Miller. Mathews has the size and strength to be a consistent starter in the NFL but lacks the "home run" threat. However, he did impress with his sub 4.5 40 time at the combine. Look for him to go early 2nd round to a team looking for a big power back to go along with a fast undersized back.

#3 Jahvid Best
 California
 Height: 5'10 • Weight: 195
 40 Time: 4.35

CAREER STATISTICS

Year	Rushing				Receiving			
	Att	Yds	Avg	TD	Rec	Yds	Avg	TD

TTLS	364	2668	7.3	29	62	533	8.6	6

Strengths: Has elite speed evidence of his 4.35 40 time at the combine. Can explode through a hole and take it the distance. Shows good patience and vision. Has the ability to make game-changing plays with his speed.

Weaknesses: Suffered a serious concussion late in his senior season that raised some eyebrows. Will have to improve his blocking technique. He also needs to add bulk if he's going to be able to sustain punishment at the next level. Doesn't break many tackles.

Overall: Best is similar to Spiller in speed and explosiveness but doesn't have the strength and bulk Spiller has. Despite questions about his size and durability, Best can make an instant impact in the return game as a rookie. While he probably will never turn into an every down back in the NFL, Best will get plenty of touches in the slot and as a weapon in the return game. Look for him to get drafted in the early 2nd round.

RUNNING BACKS RANKINGS

#4

Jonathan Dwyer

Georgia Tech

Height: 5'11 • Weight: 230

40 Time: 4.50

CAREER STATISTICS

TTLS	517	3226	6.2	35	15	263	17.5	1

Strengths: Attacks the hole aggressively and runs with authority. Can be explosive bursting thru the hole. Has deceptive speed evidence of his career 6.2 ypc and has the ability to take it the distance. Has exceptional inside running ability.

Weaknesses: Very inexperienced in the passing game both as a blocker and receiver coming from a triple-option offense. Had problems handling pitches. Doesn't possess great top end speed and ran a poor 40 at the combine. Missed playing time with injuries due to his aggressive running style.

Overall: : Dwyer has the size and strength to become a good power back in the NFL. His shortcomings in the passing game as a blocker and receiver due to inexperience will prevent him from being a three-down back early in his career. He is a great short yardage back and has all the physical tools to become a Pro Bowler if he improves his technique. Expect Dwyer to get selected somewhere in the mid to late 2nd round.

#5

Dexter McCluster

Mississippi

Height: 5'8 • Weight: 172

40 Time: 4.58

CAREER STATISTICS

Year	Rushing				Receiving

TTLS	304	1955	6.4	15	304	2041	13.4	7

Strengths: McCluster has the explosiveness and quickness to make something good happen whenever he touches the ball. Shows good instincts and vision in open space and runs very hard for his size. Versatile player who primarily played RB in college but also was lined up at receiver.

Weaknesses: Size, Size and Size. Most NFL teams will shy away from McCluster due to his small stature. He also is surprisingly inexperienced in the return game with just 2 punt returns his final two seasons. Had problems securing the ball and will have to improve his routes as he will be used in the slot often.

Overall: : McCluster had an outstanding Senior Bowl week and improved his draft stock by showing off his explosiveness and versatility. Was impressive at the combine workouts especially doing 20 reps on the 225 lb bench press. He reminds many scouts of current San Diego Charger Darren Sproles and he can be very effective if he is used in a similar situation. McCluster will be drafted in the late 2nd to early 3rd round.

RUNNING BACKS RANKINGS

#6

Anthony Dixon
Mississippi State
Height: 6'1 • Weight: 245
40 Time: 4.54

CAREER STATISTICS

Year	Rushing				Receiving			
	Att	Yds	Avg	TD	Rec	Yds	Avg	TD

TTLS	910	4014	4.4	42	56	449	8	4

Strengths: Great size and runs hard. Can break several tackles in the open field and uses his size to punish DBs. Is very effective in goal-line and short yardage situations. Carried the workload and showed good durability throughout college with 900+ carries.

Weaknesses: Will have to drop more weight and improve his overall strength. He is going to have to lean more when he runs as he tends to run upright a lot of the time. Also needs to get better in pass protection.

Overall: Dixon had an outstanding career at Miss St with 40 career sts and 4,000+ yds. He is used to being able to handle the full workload and can be a workhorse for an NFL team if he gets stronger. He will have to improve his blocking and drop a few lbs though. Dixon will probably get drafted in the 3rd round and would be a great compliment on a team that already has a quick scat back.

#7

Toby Gerhart
Stanford
Height: 6'0 • Weight: 235
40 Time: 4.58

CAREER STATISTICS

Year	Rushing				Receiving			
	Att	Yds	Avg	TD	Rec	Yds	Avg	TD
2006	106	375	3.5	0	15	124	8.3	0
2007	12	140	11.7	1	0	0	0	0
2008	210	1136	5.4	15	13	114	8.8	0
2009	343	1871	5.5	28	11	157	14.3	0
TTLS	671	3522	5.2	44	39	395	10.1	0

Strengths: Outstanding inside runner that can follow his blockers in the hole. Uses his shoulders to deliver blows to opposing defenders. Can run thru arm tackles easily and gains a significant amount of yards after contact. Has good vision and can surprisingly cut well especially in traffic. Played in a pro-style offense.

Weaknesses: Lacks wiggle and top end finishing speed to become a home run threat. Was used heavily his last two years with 550+ carries and is limited with a knee brace that he has worn since he missed the 2007 season with a knee injury. Has decent hands but will have to improve all phases of the passing game including his route running and his pass blocking.

Overall: Gerhart has the mentality and physical tools to be a good starting back in the NFL. What he lacks in speed he makes up for in aggressiveness and the ability to break tackles down the field especially against undersized DBs. Gerhart will likely get drafted in the 2nd-3rd round and would fit nicely in a West Coast offense where he wouldn't be put in many blocking situations.

TTLS	347	2213	6.4	13	66	542	8.2	2

Strengths: Has great explosiveness and speed. Can stop and start on a dime which enables him elude would be tacklers. Can hit the hole fast, break it to the outside and outrun defenders. Catches the ball out of the backfield well and is dangerous after the catch. Has great acceleration and has shown the ability to be a dangerous returner.

Weaknesses: : Not an aggressive runner and sometimes avoids contact by running to the outside. Does not like to attack the line of scrimmage and can be indecisive in finding a running lane. Does not pick up many yards after contact and can be tripped up easily. Had ball security and nagging injury concerns throughout college.

Overall: : McKnight had the misfortune of being labeled as the next “Reggie Bush” at USC and he never lived up to those lofty expectations. While he doesn’t have the overall skills Bush has, he certainly is an outstanding athlete that is dangerous in the open field. McKnight as expected had a great combine workout which likely put him in the 3rd round range but question marks about his strength and bulk will prevent him from going much higher.

Montario Hardesty
Tennessee

Height: 6'0 • Weight: 215
40 Time: 4.49

CAREER STATISTICS

TTLS	560	2391	4.3	26	38	405	10.7	1

Strengths: Hardesty had a breakout senior season with 1,345 yds (4.8). He shows good vision and uses it to see cutback lanes. Is deceptively fast evidence of his impressive 4.49 40 at the combine. Can be an aggressive runner that attacks the hole and can break tackles. Has a nice build and is a strong back who gains yards after contact.

Weaknesses: Despite the quick 40 time at the combine, lacks elite speed and quickness. Runs upright too often and struggled running sideline to sideline against elite SEC defenses. Does not have the elusiveness to make many defenders miss. Durability could be a concern as he was often injured during his first three seasons.

Overall: Coming into his senior season Hardesty was a late round pick at best, but after having a great year and an impressive combine workout Hardesty maybe looking at a 3rd round selection. There are going to be durability concerns as Hardesty was only a full-time starter for just one season however. Hardesty however can easily become a starting back in the NFL if he continues his improvement.

Ben Tate
Auburn

TTLS	678	3321	4.9	24	53	336	6.3	0

Strengths: Has the vision to see cutback lanes and once he finds it can hit the hole quickly. Consistently runs hard and is a tough runner in between the tackles. Catches the ball out of the backfield well.

Weaknesses: Does not have the ability to make big plays consistently. Needs to become better at breaking tackles for his size and has to improve his strength. Had trouble getting to the outside against speedy SEC defenses. Needs to significantly improve his pass blocking. Runs a little too stiff which hurts his cut-making ability.

Overall: Tate is a good all-round back that does almost everything well but nothing great. He had a nice career at Auburn with 3,000+ yds (4.9) but will have to improve his game in all areas if he wants to be a full-time starter at the next level. Realistically, Tate will be a nice complimentary 3rd down back and will be drafted somewhere in the 4th round.

2009	22	82	3.7	2	2	13	6.5	0
TTLS	159	1084	6.8	19	4	15	3.8	0

Strengths: Uses his body to initiate contact and runs through defenders. Fights for every yard and is very effective in goal-line situations. Great size and has a thick muscular build. Is a good blocker that uses good technique and effort.

Weaknesses: Only had 1 year of great production and played in a spread offense where the running lanes will be much different than a pro-style offense. Runs upright which leaves him open to taking hard hits. Does not explode through the hole. Does not have much experience running pass routes.

Overall: Blount came into the season as a 1st-2nd prospect but those hopes were dashed with his post game outburst at Boise St. He has handled himself well since the incident and had a good Senior Bowl week. If can continue his improvement on and off the field, Blount can have a nice NFL career. But with those character issues still out there he is looking at a 4th-5th round selection.

2009	116	542	4.7	4	8	54	6.8	1
TTLS	424	2317	5.5	32	31	260	8.4	3

Strengths: Great inside runner that gains many yards after contact. Has nice feet for his size and runs with his shoulder square and under control. Has great strength and attacks the line of scrimmage. Is always looking to gain an extra yard or two and is not afraid of contact. Was able to wear down opponents and gain many yards late in games.

Weaknesses: Is not an experienced lead blocker. Will have to improve in all areas of the passing game especially his pass-catching ability. Broken collarbone his senior season will raise some durability questions but he did not have many injury issues his first three seasons.

Overall: Scott is a tough physical back that will be great in short-yardage and goal-line situations. His inexperience as a receiver and a blocker will likely keep him on the sidelines for many plays early in his NFL career. If he can improve in those two areas Scott can become a starter someday. However, his collarbone injury will likely drop him to the 4th-5th round range.

#13

Chris Brown
Oklahoma

TTLS	627	2923	4.7	42	44	323	7.3	3

Strengths: Runs tough for his size and has showed the ability to break tackles. Follows his blockers well and is good at running through traffic. Catches the ball out of the backfield well especially on screen passes. Attacks the hole aggressively and continues to fight for yards after initial contact.

Weaknesses: Lacks ideal size and struggles in his blocking. Does not possess elite speed and gets caught from behind easily. Split carries at Oklahoma and does not have the durability to handle the full workload at the next level.

Overall: Brown does a lot of things well but his size is going to hamper him at the next level. He will have to improve his blocking significantly if he hopes to be on the field consistently. Because of his nice production at Oklahoma (2,923 yds, 42 TDs) Brown will likely get drafted in the 5th-6th round range but will find it tough having a long successful career.

TTLS	415	2008	4.8	17	37	400	10.8	2

Strengths: Has nice size with a good physique. Runs hard inside and has the quickness to elude defenders. Plays with a lot of passion and is not afraid of contact. Does well in the passing game both blocking and receiving.

Weaknesses: Was never the featured back for long stretches playing behind Donald Brown (#1DC Colts LY). Has character issues after being suspended and arrested on more than one occasion. Doesn't have the ideal speed and acceleration to make big plays. Will have to improve his pass blocking.

Overall: Dixon had a great senior season with 1,115 yds (4.6) for UConn and will likely get drafted in the 5th-6th round range due to his size and his pass catching ability. His off the field issues however will prevent him from going any higher.

#15

Stafon Johnson
USC

Height: 5'11 • Weight: 214

2009	32	157	4.9	5	1	2	2	0
TTLS	271	1591	5.7	19	12	65	5.4	0

Strengths: Very tough runner that is hard to bring down. Follows his blockers well and shows good vision in finding the open holes. Hits the line of scrimmage hard and gains a lot of yards after initial contact.

Weaknesses: Health will have to be evaluated closely after sustaining a major neck injury in a weight lifting accident. Lacks maneuverability and elusiveness to make defenders miss. Does not possess an extra gear and will have to improve his blocking techniques.

Overall: Johnson is an ideal short-yardage back that consistently fights for yards. Before the injury many scouts thought Johnson was the best all-round back in the talented USC backfield. However, the serious injury will be on the minds of many GMs and Johnson unfortunately went from being a 3rd round pick to a 5th-6th round selection.

TTLS	698	3140	4.5	34	127	898	7.1	3

Strengths: Starks is a tough runner that runs hard and very rarely takes the big hit with his low to the ground running style. Uses his feet well to continue fighting for every yard after initial contact. Has nice patience in waiting for holes to open. Does a good job following his blockers especially when he catches the ball out of the backfield.

Weaknesses: Sat out entire '09 season with a shoulder injury, which brings up durability questions. Does not have great quickness and lacks the home run threat. Will need to improve his pass blocking technique.

Overall: Starks is a tough competitor that plays hard every down. While does not have elite speed, he did run a 4.5 40 at the combine which raised some eyebrows. While his shoulder injury likely cost him a round or two in the draft, look for James to be drafted in the 6th round range.

#17

Keiland Williams
LSU

2009	70	368	5.3	4	4	22	5.5	0
TTLS	299	1699	5.7	17	28	273	9.8	2

Strengths: Great physique. Always runs under control and has great balance and agility for his size. Catches the ball out of the backfield well and is a smooth runner in the open field. Decent pass blocker.

Weaknesses: Was never the feature back in a talented backfield in college. Does not possess elite speed. Could improve his ability to gain extra yards after contact. Some scouts question his overall competitiveness and toughness.

Overall: Williams was a nice backup to Charles Scott at LSU but many feel he was just as talented. Because of his good physical tools look for him to be drafted somewhere the 6th round range. While Williams will never become a consistent starter in the NFL, he can be a productive backup just like he was in college.

TTLS	1181	6728	5.7	88	79	918	11.6	8

Strengths: Nice solid compact back that does everything well. Good size and strength. Used to carrying the workload and has experience catching the ball out of the backfield.

Weaknesses: Did not play against elite competition. Scouts have to wonder how much he has left in the tank after getting nearly 1200 carries in college. Also lacks elite speed to be a home run threat.

Overall: Bell is an interesting prospect that had a nice Senior Bowl week which led to him getting a lot of publicity. His combine workout was not the best but still Bell is looking at a 6th selection.

TTLS	505	2162	4.3	18	55	503	9.1	1

Strengths: Nice runner in between the tackles and has the strength to shake off arm tackles. Good size and has a lot of power. Looks smooth catching the ball.

Weaknesses: Has problems in the open field and does not have the wiggle to make defenders miss. Needs to be more patient with his blockers. Lacks top end speed to be a home run threat. Durability a factor after suffering many injuries in college and was never a feature back.

Overall: James despite his good NFL bloodlines (cousin of Edgerrin James) does not have the speed and skills to be a consistent starter in the NFL and his amount of injuries really hampered his college career and draft stock. However, because of his size and his inside running ability look for James to get picked up in the 6th-7th round.

TTLS	374	2062	5.5	20	14	91	6.5	0

Strengths: Very strong and shows good quickness and acceleration. Can run away from defenders in the open field. Showed great athleticism in his Senior Bowl and Combine workouts and is a good straight line runner.

Weaknesses: Has to improve his vision. Not very elusive and does not possess the ability to move side to side quickly. Will need to improve in all areas of the passing game including his blocking and pass catching ability. Cuts outside often and needs to be more patient.

Overall: Despite being the backup to Ryan Mathews, Miller had a productive career and has been rising on many draft boards with a solid Senior Bowl week and an impressive combine where he finished 1st among RBs with 26 reps on the bench and also ran a 4.53 40. He will have to improve his blocking and overall vision but he is now likely a 6th-7th round pick and is one of the more interesting prospects at the RB position.

#21

Keith Toston, Oklahoma St • Height: 6'0 • Weight: 210 • 40 Time: 4.7

Tough runner who took advantage of added playing time his senior season. Lacks explosiveness and has had ball security issues.

#22

Andre Anderson, Tulane • Height: 5'11 • Weight: 205 • 40 Time: 4.55

Strengths: Competitive runner that gains many yards after contact. Lacks speed to be a starter but can become a quality backup at the next level.

#23

Brandon Minor, Michigan • Height: 6'0 • Weight: 220 • 40 Time: 4.6

North-South runner that breaks many tackles in the open field, Shoulder injury cost him a the chance to be a 4th-5th round selection.

#24

Patrick Paschall, North Dakota St • Height: 5'11 • Weight: 206 • 40 Time: 4.7

Tough instinctive runner who likes to break it to the outside. Did reasonably well during Shrine Bowl practices.

#25

Strengths: Tough physical runner that can catch the ball out of the backfield well. Does a nice job as a blocker and has the ability to keep defenders tied up. Nice athleticism for his size.

Weaknesses: Does not have a lot of experience. Will need to add weight to his solid frame. Needs to play with a nastier attitude and initiate contact.

Overall: Jackson has all the skills to be a solid fullback in the NFL. He has enough athleticism to be a special teams contributor as a rookie and is looking at a 5th round selection.

Strengths: Strong hard working player that enjoys contact. Does a good job as a lead blocker and can stand up linebackers in the hole. Nice inside running ability.

Weaknesses: Will need to work on his blocking technique and struggles with faster LBs. Limited experience as a receiver.

Overall: Conner is a blue-collar type of player that fights for every yard and consistently shows the ability to tie up LBs in the hole. He will have to continue to improve his blocking ability and try to improve his overall speed and quickness. Conner is looking at 5th-6th round consideration because of his attitude and toughness.

Strengths: Really nice receiver that has surprisingly good quickness in the open field. Good inside runner that always fights for extra yards. Plays with a lot of emotion and was one of the leaders on the team.

Weaknesses: Did have some off the field issues that cost him an entire season. Will need to work on his blocking technique.

Overall: Tonga would fit nicely in a West Coast offense at the next level because of his receiving capabilities. While he will have to become a better blocker if he wants to be a consistent starter, look for Tonga to get drafted in the 6th round.

Strengths: Experienced receiver that has good body control to make several catches. Not afraid to go up and get the ball in traffic. Nice runner in the open field.

Weaknesses: Will have to adjust to new position as he played TE throughout college career. Lacks the speed to separate from defenders. Will need to improve his strength.

Overall: Dickson projects more as a FB prospect at the next level because he lacks the size and strength to serve as a blocker at the TE position. He will need a year to adjust but he is probably worth 6th-7th round consideration.

Strengths: Great lead blocker that paved the way for RBs like Ray Rice and Brian Leonard while in college. Underrated as a receiver. State wrestling champion.

Weaknesses: Not much of a runner and lacks the speed and explosiveness to make any big plays with his legs.

Overall: Corcoran's limited running ability will probably drop him to the 7th round. However, he plays with great leverage and would be a great lead blocker for any team at the next level.

TTLS	147	2425	16.5	29

Strengths: Can make the tough acrobatic catches over defenders. Is a weapon in the red zone and adjusts his body well in the air. Helps QB out by coming back to the ball. Great quickness and size.

Weaknesses: Does not explode off the line. Not experienced in running pro style routes. Does not always give full effort when blocking and needs to be more aggressive. Has character issues that resulted in the NCAA suspending him in his senior season.

Overall: Bryant has all the tools (size, strength, hands) to become a premier WR in the NFL. He has great ability to turn inaccurate throws into big plays with his in-air adjustments to the ball. His character issues will drive down his draft stock a little, but he will certainly be drafted in the 1st round and most likely the top 15.

Strengths: Has strong hands. Uses his size and strength to overwhelm defenders when blocking them. Can be dangerous after the catch and is not afraid to run over would-be tacklers and does not shy away from contact.

Weaknesses: Inconsistent with his concentration which has led to many drops. Does not have elite burst or acceleration. Does not have the experience in running a variety of routes.

Overall: Inconsistent with his concentration which has led to many drops. Does not have elite burst or acceleration. Does not have the experience in running a variety of routes.

TTLS	120	2339	19.5	15

Strengths: Big play threat every time he touches the ball evidence of his 25.1 ypc his senior season. Redzone threat with his ability to bring down jump balls. Plays physical and can shake off would be tacklers. Great blocker who enjoys getting crack-back blocks on defenders.

Weaknesses: Drops the ball too often. Does not have experience in many pass routes coming from an option offense. Has problems exploding off the ball. Suffered broken foot prior to combine.

Overall: Thomas came out early after having an exceptional junior season with 1,154 yds (25.1) and 8 TDs. He had a chance to have a great combine, but broke his foot and now there will be some durability questions. Despite those concerns, Thomas is clearly a 1st round talent and has the chance to become a big play WR at the next level. Look for his name to be called in the late 1st round.

TTLS	157	2707	17.2	26

Strengths: Great hands and despite being rather short at 5-11 has the ability to outjump defenders and get the ball at the highest point. Dangerous runner in the open field and can change directions instantly. Has good lower body strength, which allows him to break arm tackles.

Weaknesses: Runs upright. Will have to improve his blocking technique and be more active. Struggles against press coverage. Lacks elite burst and speed.

Overall: Going into the combine, NFL scouts questioned Tate's straight line and breakaway speed. Tate quieted those questions after clocking an impressive 4.42 time in the 40-yd dash. Tate also was surprising in his route running ability and displayed a good attitude throughout his interviews. There is a very good chance he'll be one of the Top WRs off the board especially with Demaryius Thomas' foot injury.

Strengths: Shows good athleticism for being a big receiver. Turns up field quickly after catch. Holds onto the ball well after taking big hits. Uses size and strength to run thru arm tackles and is always fighting for extra yards.

Weaknesses: Lacks elite speed and explosiveness. Sometimes is slow getting into a route. Needs to improve blocking skills.

Overall: LaFell can be a quality starter at the next level but he lacks the speed and explosiveness of other big receivers, which will hurt his chances being the #1 guy. At the combine LaFell did not stand out in any drills and he probably is looking at a 2nd round selection.

Strengths: Excellent receiver that rarely drops any passes thrown in his direction. Not afraid to catch the ball in traffic. Can make things happen in the open field. Shows good instincts and vision when running after the catch. Is a smooth route runner that is deceptively quick.

Weaknesses: Does not possess home run speed. Is not very explosive with his first couple of steps. Needs to improve his blocking in every phase. Lacks ideal size of the more common bigger WRs in the NFL today.

Overall: Williams probably made the wise decision coming out early as he was never going to overcome his size and speed weaknesses that would put him in 1st round territory. NFL teams will use him in the slot and look for him to have a very productive career. As a rookie he will get utilized in the return game as well. Overall, Williams has the hands and athleticism to warrant a 2nd round selection.

TTLS	204	3003	14.7	25

Strengths: Great hands. Shows good concentration and makes nice adjustments when the ball is in the air. Good route-runner that has the speed and elusiveness to make big plays happen whenever he touches the ball. Dangerous returner that shows good vision to find open lanes.

Weaknesses: Will have to improve his strength considerably especially his lower body. Sometimes gets tripped up too easily. Not an effective blocker due to his size and strength.

Overall: Gilyard was a dynamic player at Cincinnati and had the ability to carry the entire team with his big plays in the receiving/return game (Pittsburgh '09). Gilyard also plays best when the lights are brightest and had a good Senior Bowl game. However, Gilyard will have to overcome questions about his size and he did run a disappointing 4.62 at the combine, which will drive his draft value down to the 3rd round.

Strengths: Shows good balance and can run well in traffic. Smart receiver that can find the open spots especially vs zone coverage. Uses his body well to go up and grab jump balls. Has a knack to make big plays with the game on the line.

Weaknesses: Despite having four relatively healthy seasons, he did miss the entire '04-'05 seasons with leg injuries. Does not possess elite speed. Has trouble holding onto the ball after getting hit hard by DBs.

Overall: Shipley had an outstanding career at Texas that seemed to last forever. Despite the great productivity, he projects as a 3rd round prospect due to his lack of great speed and size. He will have a lot of improving to do if he wants to be an consistent starter.

Totals	219	3240	14.8	31

Strengths: Can turn a simple route into a big play with his run after the catch ability. Can go up and get the ball at its highest point. Uses his height to shield defenders from the ball. Does a decent job of blocking. Very athletic and nimble for his size.

Weaknesses: Has had off the field problems and has to mature. Has had problems holding onto the football. Does not possess great speed.

Overall: While he has the size and athletic ability to be a #1 receiver at the next level, Briscoe has seen his stock fall significantly this season. At one time Briscoe received some 2nd round consideration, but because of the off the field concerns along with a poor performance at the combine, he will likely fall to the 4th round.

Strengths: Is not afraid to catch the ball in traffic. Can take a big hit and hold onto the ball. Surprisingly sharp route runner that is not afraid to be creative with his route when QB rolls out of the pocket. Aggressive blocker that uses his strength to overpower defenders.

Weaknesses: Has some character issues after being suspended for the entire '08 season and then left the team midway thru last season. Also does not have elite speed and explosiveness. Sometimes drops easy passes. Struggles with physical DBs jamming him at the line of scrimmage.

Overall: Williams has all the skills (size, hands and blocking ability) that teams are looking for in big-time receivers. His willingness to keep runs alive with his downfield blocking is an added bonus. While Williams has 1st-2nd round talent, his character issues will drop him to the 4th round.

2009	50	758	15.2	5
TTLS	227	3119	13.7	24

Strengths: Tough physical player that is willing to sacrifice his body to make the big catch. Can read defenses well and finds the open spots in zone coverage. Does a nice job of adjusting to inaccurate passes. Nice work ethic and hustles on every play. Is very dangerous in the red zone.

Weaknesses: Struggles when he goes up against press coverage. Durability a factor after a foot injury sidelined him for the last part of his senior season. Tends to round off routes and needs to make better cuts.

Overall: Decker was looking at a possible 2nd-3rd round selection but after the foot injury, he is now looking at a 4th-5th round pick. Decker was also a solid baseball player in college, but has recently said that baseball is on the backburner for now. Decker is a very smart player and he if fully recovers from the foot injury, he can turn into a dependable receiver at the next level.

Strengths: Knows how to get open easily and can read defenses. Takes care of the football in traffic. Is a weapon on slant routes with his ability to go over the middle. Consistent, tough blocker. Can play on special teams.

Weaknesses: Struggles against press coverage. Has problems beating his man off the ball. Goes down too easily for his size. Not very elusive in the open field. Lacks experience in a pro-style offense.

Overall: Cooper has the size and smarts to be a productive player at the next level, but lacks the explosiveness and speed to be a consistent playmaker. Look for him to be a contributor on special teams and become a 3rd down possession receiver.

Strengths: Nice athleticism especially in the open field. Cuts quickly and smoothly. Has the ability to find soft spots in coverage. Does a nice job getting the ball at its highest point and going over cornerbacks in jump ball situations. Has nice balance and plays under control.

Weaknesses: Does not possess top end speed nor explosiveness to elude defenders consistently. Needs to be more physical especially with his blocking.

Overall: Williams had a very productive career in college with 2807 receiving yds (14.2). While he has excellent hands and has the ability to get open often, he did struggle at the Senior Bowl, which will hurt his draft stock. Look for him to get drafted in the mid to late rounds. Williams does have the ability to be a nice #2 receiver.

2009	40	706	17.7	4
TTLS	105	1648	15.7	9

Strengths: Great length. Has big-play capabilities with his superior run after the catch instincts. Has a really quick first step that allows him to accelerate past defenders. Does a nice job adjusting to the ball in the air.

Weaknesses: Does not have great hands and lets the ball into his body rather than going up and getting it at its highest point. Plays smaller than his size. Will have to be more physical in his play especially his blocking. Has issues with work ethic.

Overall: Williams has the size and speed to become a consistent #2 option for any team at the next level. However, he is going to have become more physical and use his size to his advantage as he often plays like a small slot receiver. He probably could have used another year to hone his overall skills but after his solid combine, look for Mitchell to get drafted in the mid-rounds.

2009	77	792	10.3	8
TTLS	285	3743	13.1	37

Strengths: Plays bigger than his size. Known for stepping up game against better competition. Can return punts. Has nice agility and can make defenders miss in the open field. Creates separation from defenders with timely double moves.

Weaknesses: Will have to add bulk and strength to become a more durable player at the next level. Drops too many catchable passes. Needs to get better burst with his first step off the line to prevent getting jammed by the bigger more physical CBs at the next level.

Overall: Has been rising on many draft boards after his solid performances at the Senior Bowl and the Combine. Roberts can use his speed and ability to return kicks to see the field right away. Look for him to get drafted in the mid-rounds, but he has a chance to go higher if he continues to impress.

TTLS	191	2778	14.5	22

Strengths: Nice athleticism for his size and runs smoothly. Very dangerous on inside slants over the middle and has the ability to break tackles in the open field. Turns up field quickly and runs with authority that gives him a lot of extra yards especially with his long stride.

Weaknesses: Not very explosive. Will have to run cleaner more crisp routes. Has missed a lot of time with a knee injury so durability is a major question.

Overall: Alexander had a great senior season with 1781 receiving yds (15.8) after struggling most of his college career with injuries. He has a lot of potential with his size and toughness and could grow into a TE someday. However, the question marks about his knee will hurt his draft stock especially since he missed the Combine. Look for him to get drafted in the middle rounds.

Strengths: Speed, Speed and Speed. Ford is very explosive and can make a big play happen whenever he touches the ball. Can accelerate to top speed quickly and create separation from DBs. Consistently makes the first man miss as a returner.

Weaknesses: Size, Size and Size. Ford lacks the ideal size and strength of typical NFL receivers and durability will be a question. Also needs to improve his hands as he drops way too many passes. Not a great route runner.

Overall: : Ford's 4.28 40 at the Combine was one of the best ever and that alone will get him a chance to be drafted as high as the 3rd round. However, Ford's small stature is a concern. It should also be noted that he avg 13.9 ypc in his career which isn't spectacular for a guy with his speed. He can be a playmaker in the return game if he stays healthy and look for him to get drafted in the mid rounds.

Strengths: Great arm length and size. Can run well after the catch with his long stride. Nice blocker that initiates contact on defender.

Weaknesses: Very raw with only 1 year as a starter. Developmental route runner that has average instincts. Is not very explosive and has problems separating from defenders especially against press coverage. No real experience on special teams.

Overall: Easley was a former walk-on who came on his senior season with 893 yards (18.6). He is still very raw, but has a lot of upside. His 4.46 40 he ran at the combine coupled with his nice size has him shooting up a lot of draft boards. David Reed
Utah

Height: 6'0 • Weight: 188

40 Time: 4.50

Strengths: Has very nice hands. Has good vision in the open field and does a good job tracking down the ball while it's in the air. Adjust his routes and his body to turn what would be incomplete passes into acrobatic big plays.

Weaknesses: Lacks experience with only 1 full-year as a starter at the Division 1 level (Juco 1st two years). Not a great blocker and does not possess ideal size. Does not have great explosiveness or the ability to create separation.

Overall: Reed showed great big play ability in his only year as a starter. When you consider he was playing with inexperienced QBs, his 1616 yds (15.2) is rather impressive. While he does not have great top end speed, he was able to consistently get open. He will have to improve significantly as a blocker. Look for him to get drafted around the 5th round.

Strengths: Had an excellent combine showing off his size, strength and speed (4.41). Has the ability to separate from defenders and helps the QB out by continuing routes when QB is flushed out of the pocket.

Weaknesses: Lacks elusiveness and does not cut that well. Can get knocked off his routes and struggles against press coverage. Needs to use hands better instead of cradling the ball. Can be a better runner after the catch.

Overall: Price has been shooting up draft boards after his impressive combine workout. He is going to have to improve in several areas especially his pass routes and blocking. Price does have a lot upside with his speed and athleticism and look for a team to take him in the mid rounds.

#1 Jermaine Gresham

Oklahoma

Height: 6'6 • Weight: 260

40 Time: 4.70

Strengths: Smooth, fluid receiver that turns up field quickly with the ball in his hands. Catches passes behind him without losing forward movement. Does a nice job blocking on runs when in position. Has good work ethic.

Weaknesses: Drops too many easy passes. Runs upright which opens up his body to taking big hits. Not a great blocker. Suffered serious knee injury that sidelined him all of the '09 season.

Overall: Gresham showed great durability during his first three seasons and could have been a 1st round draft pick last year but decided to return for his senior season and did not play a single down. The knee injury will raise many durability questions, but Gresham has the strength, speed and toughness to be a big playmaker at the next level. He will probably need a year to adjust to a pro style set and test his knee, but look for Gresham to have a solid pro career after getting drafted in the late 1st to early 2nd round.

Strengths: Shows strong hands when catching the ball. Dominant blocker that can deliver devastating crack back blocks. Can use his superior strength to get past jams at the line of scrimmage. Runs surprisingly nice routes for his size.

Weaknesses: Lacks great speed and elusiveness to make defenders miss. Does not possess the acceleration to pull free from man-to-man coverage. Missed all of '09 season with a back injury.

Overall: Complete player that has the catching and blocking ability to be a great pro. His injured back and limited lower body flexibility will raise concerns, but Gronkowski can start as a rookie and look for him to go off the board in the 2nd round.

TTLS	111	1382	12.5	12

Strengths: Great hands. Was very effective catching inside option passes and turning upfield without hesitation to move the chains. Has good body control and balance. Shows nice vision and elusiveness in the open field.

Weaknesses: Limited experience running pro-style routes. Does not possess elite speed and will have to become a stronger blocker. Will need to put on weight and become more of a physical player. Torn muscle in back prevented him from working out at combine.

Overall: Hernandez can be a great situational TE on 3rd-down passing situations. He will need to become bigger and stronger at the next level if he wants to become an every down caliber player. Look for Hernandez to go somewhere in the 2nd round.

Strengths: Has the ability to catch-off target passes. Runs fluidly in the open field. Very durable with no significant playing time missed in his career.

Weaknesses: Needs to be more aggressive in his blocking and explode off the ball in his routes. Needs to run his routes more crisply and cleanly to create separation from defenders. Has average instincts.

Overall: With his size, speed and the way he moves in the open field, Dickson looks the part of an NFL TE. He will have to become a more consistent blocker and be more explosive. If he improves in those areas, he will be a solid pro. Look for Dickson to be drafted in the 3rd round.

Strengths: Consistent blocker that runs nice routes and shows good speed in the open field. Has good hands and has great leaping ability for his size to go up and win jump-ball situations against defenders. Not afraid to take a hit.

Weaknesses: Lacks explosiveness. Needs to be more aggressive in his blocking. Was not very effective in red zone. Is knocked off his routes too easily in underneath coverage.

Overall: McCoy is a solid TE prospect that does almost everything well, but does not have any features that make him stand out from the others. He can someday become a NFL starter if he can improve his quickness. Because of his all-round skills, look for him to go off the board in the 3rd round.

Strengths: Great pass catcher with nice athleticism. Excellent career production with 221 career receptions and 2,904 yds. Can go up and catch the ball at the highest point. Very mature player that has great work ethic.

Weaknesses: Will need to add weight and improve his strength. Lacks explosiveness coming off the line. Does not have the elusiveness in the open field to make defenders miss. Is not a strong blocker that can finish off the defender.

Overall: Pitta can be a very effective player right away at the next level in passing situations with his outstanding hands. If he can improve his blocking he has a chance to be an every down player. Look for him to get drafted somewhere in the 4th round.

Strengths: Nice soft hands and shows good athletic ability and body control. Not afraid to catch the ball in traffic and has good vision in the open field. Experienced in a pro-style offense and runs good routes. Smart player that can find the soft spots in zone coverage. Good blocker.

Weaknesses: Lacks ideal size. Will need to add weight. Can be knocked off his route too easily. Has serious durability questions after missing 15 games the last three seasons with a multitude of injuries.

Overall: Moeaki is an all-round talent with great pass catching ability and good blocking technique. If he did not have all the injury concerns he would be rated much higher. Look for Moeaki to go in the 4th round range.

Strengths: Nice size with good arm length. Very durable with no significant loss time due to injury. Not afraid to catch the ball in traffic. Nice blocker.

Weaknesses: Not a high character player with 3 suspensions in two years. Does not grab the ball at its highest point and often lets the ball into his body instead of snatching it in the air. Lacks explosiveness and acceleration off the line. Not a down field threat.

Overall: Quarless does not possess a lot of upside with his limited burst and quickness. He does a lot of things well but nothing great. He can become a solid #2 TE at the next level and will get picked up in the mid rounds.

#9 Colin Peek Alabama

Height: 6'5 • Weight: 250
40 Time: 4.82

Strengths: Smart player that is a reliable blocker and pass catcher. Runs nice routes and can make the tough catches over the shoulder. Plays aggressively and gives an all out effort on every down.

Weaknesses: Lacks the speed and explosiveness to be a big playmaker at the next level. Missed combine workout due to hamstring pull. Struggles as a blocker especially against bigger defenders.

Overall: Peek will be more of a workmanlike player that will be used primarily in blocking situations. He will probably make it as a backup and look for him to go in the 4th-5th round range.

#10 Jimmy Graham Miami, FL

Height: 6'6 • Weight: 259
40 Time: 4.59

Strengths: Great size and speed. Very effective in the red zone. Stretches the field vertically and showed the ability to run in traffic after the catch. Showed improvement in all areas throughout the season.

Weaknesses: Very raw with limited experience. Does not always look comfortable catching the ball and has too many drops. Struggles in press coverage. Will need to improve his strength. Not a willing blocker.

Overall: Graham only played 1 season of football after playing 4 years of basketball. Despite his inexperience, Graham has a lot of upside and athleticism. His 4.56 40 at the combine raised a lot of eyebrows and he can definitely be a weapon in the passing game. He will have to improve his blocking significantly. If Graham can go to a patient coaching staff, he can become a solid starter someday. He will probably go in the 4th-5th round.

#12 Nate Byham, Pittsburgh • Height: 6'4 • Weight: 268 • 40 Time: 5.00

Has nice size and speed. Struggles with inconsistencies catching the football and needs to improve his cut-making ability.

#13 Jereon Mastrud, Kansas St • Height: 6'5 • Weight: 256 • 40 Time: 4.7

Has great versatility and is a solid route runner. Competes on every play. Needs to add more weight to his tall frame and be more aggressive. Will be a solid backup in the NFL.

#14 Dedrick Epps, Miami (FL) • Height: 6'3 • Weight: 250 • 40 Time: 4.7

Good athlete that is quick off the ball. Will need to get much stronger and improve his blocking technique and show more willingness in blocking situations.

#15 Garrett Graham, Wisconsin • Height: 6'3 • Weight: 243 • 40 Time: 4.75

Smart player that shows good body control and balance. Reliable pass catcher with soft hands. Lacks the ideal size to be an every day TE and will be used more in a H-Back role.

Strengths: Great run blocker, especially as a zone blocker. Shows a good combo of size, agility, and strength. Moves well at the second level and sustains well at the second level. Good technician that could come right in and start from day one. Strong punch. Mirrors well. Good knee bends.

Weaknesses: Missed three games due to thyroid problem during the season and will need to be evaluated. Lacks the speed to handle many of the top speed rushers at this point so he could potentially be a right tackle only. Likely just a zone blocker.

Overall: Because of the history of Iowa linemen and the fact he is just like previous ones with good technique, good strength, and ability to block at the second level he is probably the safest pick among the linemen if put at right tackle. Could start from day one and while he might not have the high upside of some others he could potentially be the safest pick and even land in the top 5-10 picks.

Strengths: Showed outstanding speed at the combine running a surprising 4.81 40-yard dash. While he lacks ideal size he is a player that showed steady improvement throughout the season and solidified a top 15 grade with a great combine. Tough player with good work habits. Fires off the ball and could be a solid run blocker. Bends and anchors well.

Weaknesses: Overextends when trying to punch and looks slow against blitzing linebackers in space. Reaches sometimes. Some felt he was perhaps out of shape during the season and can be lazy at times.

Overall: Likely boom or bust player as he possesses first round talent but is lazy at times and could get lazier with a lot of money in his pockets. Must become more consistent and work on his play on the left side. Big body that has a balanced skill set that will allow him to play on either side. Likely a top 10 selection.

Strengths: Very athletic kid with long arms and good size. Good first step on kick slide and mirrors well. Agile for his size. Has the flexibility to adjust to blitzers. Good quickness in his kick slide. Does not get beat on the edge. Really fires off the ball in goal-line situations.

Weaknesses: Inconsistent hitting defenders in space. Sometimes gets called for holding because he does not always hit his targets square on. Good job of hitting linebackers at the second level but fails to sustain when punching instead of locking on.

Overall: Two-time All-Big 12 selection with good feet but lacks ideal foot speed to play left tackle. Likely a right tackle early in his career. Probably a developmental starter for a year or two but has pro bowl potential and is one of the best most balanced blockers in this draft. Likely a top 10 selection.

TTL	38	32

Strengths: Plays with good balance and shows good strength. Can stun defenders with his punch and does a good job of sealing defenders, driving his legs, and finishing blocks. Shows quick feet and body control to excel when pulling and trapping.

Weaknesses: Doesn't always hit his target at the second level. Can be late getting out of his stances and sometimes allows defenders to get inside his frame. Weight management is a concern. Gives up a lot of ground in the pocket and needs to improve his anchor.

Overall: Davis is a two-time All-Big East selection who entered college as a Parade All-American. He stepped right in at right guard as a freshman and quickly became one of the best in the nation. His strength and weight force him to settle in at the right side of the line. There are maturity questions on him and his private workout that has been scheduled could be key in guaranteeing that he is selected in the top 25.

Weaknesses: Lacks experience and is inconsistent in the run game. Also considered just a workout warrior. Does not show a nastiness on the field and is just an average finisher. Struggles to counter to spins and inside moves. Durability is a question mark.

Overall: Campbell entered the NFL Scouting Combine as a late first to early second round projection but timing as low as 4.75 on some hand held clocks and his impressive performance in position drills as well as the lifts has potentially vaulted him into the top 15-20 selections.

Weaknesses: Needs to get stronger. Toughness is questionable. Needs to learn to drop his hips. Can be slow off the snap. Struggles with speed rushers. Inconsistent contact balance. Waist bender. Falls off blocks. Average body control.

Overall: Two-time All-Pac 10 selection that showed the potential to start while at the Senior Bowl. Has the physical tools and has been dominant enough to warrant a late first or second round grade. Likely a zone blocker in the NFL.

Weaknesses: Lacks a mean streak. Does not consistently lock out. Does not finish. Limited experience pulling and trapping. Does not drive defenders off the ball.

Overall: He had a knee injury in 2008 but has since bounced back with a great senior season in which he earned All-Big Ten honors and was very impressive at the East-West Shrine Game. His stock has been on the rise ever since and could ultimately land in the top 75 selections.

Showed a nasty streak early in the season and was very impressive driving defenders to the second level and finishing. Very smart. Learns quickly.

Weaknesses: Arms are just barely long enough for tackle (33 inches). Toughness has been questioned. Raw in technique. Waist bender at times and is inconsistent finishing blocks. Misses targets sometimes and must improve his balance. Inconsistent with handling of speed rushers.

Overall: Two-time first team All-GLIAC selection and 2009 first-team All-American with great size and athletic ability. Great raw talent but needs some coaching. His performance at the combine likely vaulted him from the 4th-5th round to a solid 2nd-3rd round selection.

Weaknesses: Struggles at times with smaller defenders. Bends at the waist instead of knees, especially when he gets tired. Struggles to adjust in space. Might need to lose some core weight. Questionable conditioning.

Overall: A four-year starter at guard that will likely kick out to tackle at the next level. He is the brother of Atlanta Falcons DT Peria Jerry. He is a two-time All-SEC selection that has the size and strength teams are looking for. His stock has increased since the end of the season and has gone from a likely mid round selection to a potential top 100 pick.

Could potentially move inside to guard in the NFL. Good quickness when pulling and trapping. Can strike a moving target and sustain blocks.

Weaknesses: Needs to bend more at the knees. Doesn't explode from his stance to block down on the edge. Comes out of his stance upright too much and can get walked back. Is not very physical and is too soft. Too easily swatted away and is mechanical in his play.

Overall: A three-year starter and 2009 All-Big East selection, Capers has the athletic ability and upside to become a starter. This former tight end will likely be a left tackle at the next level.

Weaknesses: Late to locate and adjust on the move and slides off blocks. Lets defenders get under his pads. Gets caught off guard and struggles to handle outside speed. Lacks nastiness and has a tendency to play high. Sometimes takes false steps and questionable angles.

Overall: Bounced back from a broken fibula in 2007 to start two seasons and earn All-ACC honors in 2009. He is a former tight end that will need work but has some potential. Likely going to be a backup for a few years while he refines his technique. His athletic ability is hard to ignore though and will likely be selected in the mid rounds.

Weaknesses: Plays too soft and passive at times. Needs to improve functional strength. Blitz recognition needs work. Was arrested and suspended for a game in 2009 for operating a moped while intoxicated.

Overall: Like Bulaga, Calloway is technically sound and has the size, athletic ability, and production that scouts look for. He is a three-year starter and two-time All-Big Ten honoree who has the versatility to be a solid backup early on his career. Likely a 4th or 5th round selection.

Strengths: Quick, athletic, and has long arms. Good feet and balance. Fluid in the open field when pulling and trapping. Has adequate balance to get to the second level and quick, active hands to control defenders when he keeps his feet moving.

Weaknesses: Has medical questions after missing time with an undisclosed illness as a senior, a sprained right ankle as a junior, and dislocated elbow as a freshman. Former tight end that still needs to bulk up more. Not strong or physical. Has a thin lower body. Gives up way too much ground against power rushes.

Overall: Flashed early in his career when he was named a Freshman All-American but injuries have derailed a once promising career. If he can get healthy, he has the athletic ability and upside teams covet and could land in the top 150 selections, but if he does not pass medical exams from the combine then he likely will go undrafted.

Weaknesses: Inconsistent during the season flashing the ability to dominate but also giving up too many sacks. Needs work on his technique. Scouts question his maturity and he has had problems with the law. Plays too high and is still raw. Needs to get stronger. Doesn't block with leverage.

Overall: Two-time All-American that came out after the combine with his off-field issues and a statement explaining that he regrets the decision and is ready to move forward. Highly athletic player with a great field presence. Great upside but has mental questions surrounding him due to maturity issues. If he can prove to be mentally ready for the NFL, he could end up being a solid starter. He could land anywhere from the 3rd to 5th round.

TTL	50	50

Strengths: Very smart with great size and experience. Durable. Understands blocking angles. Drives off the ball well. Stays with his man after initial contact to prevent secondary rush. Good drive blocker.

Weaknesses: Lacks the footwork to pull and trap. Late out of his stance and not quick into blocks. Plays too high and loses leverage. Must improve blitz awareness. Inconsistent sustaining second-level blocks.

Overall: A four-year starter, Young is experienced and possesses the size, strength, and pedigree that NFL teams look for. While he is not considered one of the more athletic tackles in the draft, he is still the type of player that teams take a chance on in the mid-late rounds.

Strengths: Has outstanding size, length, and physical presence. Athletic. Moves well. Has the feet and length to handle speed rushers. Upside is outstanding.

Weaknesses: Raw player that needs to be more consistent, bend more, and does have off field issues from his past that could hurt him on draft day. Technique as a run blocker and use of hands needs work.

Overall: Named top offensive lineman at the East Coast Bowl and was solid at the Texas vs. Nation Game. Has great upside and ideal size making him a prospect that could land in the late rounds as a developmental selection.

Strengths: Great size. Good strength. Adequate arm length. Has rare straight-line speed for the position and fires out of the chute. Good quickness out of the blocks and can get around the line to pull. Has the balance to execute cut blocks.

Weaknesses: Inconsistent off the snap. Needs to get stronger. Sometimes gets beat on counter moves and needs to work on sustaining blocks. Must improve blitz recognition. Can improve blocking angles as well.

Overall: A two-year starter that still needs work on technique, but is still quick and athletic for a man his size as a former tight end. Could be an intriguing late round pick due to upside.

Strengths: Great size. Anchors well and is strong at the point of attack. Good knee bend and takes angled, short steps in pass pro. Mirrors well. Good balance. Has enough agility to get to the second level. Has the versatility to play guard or tackle because he is smart, has great size, and good footwork.

Weaknesses: Short arms that could perhaps end up forcing a move to guard. Needs to be more aware of blitzing linebackers off his man's inside shoulder. Shorter defenders can get into his chest at times and knock him back.

Overall: Three and a half year starter who has earned All-Pac 10 honors three years and was an All-American in 2009. His intelligence, size, strength, and mean streak are things that coaches look for and should allow him to be taken in the mid to late rounds.

Strengths: Lacks ideal size for tackle but has great footwork, is quick, and has good strength. Explosive athlete that tests very well. Moves well for his size. Athletic kid with the bulk to even move inside to guard. Could potentially be a backup at multiple positions.

Weaknesses: Has not always been a dominant player at the small school level. Level of competition is something that might worry teams. Developmental prospect that will take some time before he is ready to become a starter. Is still in the stages of evaluation as he did not come on to the NFL radar until mid-season. Raw player that will need a couple of years before he is ready to step in.

Overall: Started at least two games every year of his career. Late bloomer as he earned post-season honors just once as a two-time first-team All-Patriot League selection at right tackle. His athletic ability, footwork, and strength make him a worthy late round project to take on.

TTL	49	49

Strengths: Has outstanding size. Team captain with 49 straight starts at right tackle. Has initial quickness getting off the line and good straight-line speed. Able to redirect to hit the moving target. Hustles to the second level. Effective pass blocker. Long arms and good upper body strength.

Weaknesses: Lacks body control to maintain his balance while engaged with the defenders. Ends up on the ground too much. Lacks the athleticism to recover if beaten at first. Sometimes caught leaning outside and gives up the inside lane to a quick spin move.

Overall: His durability, size, and experience make him a player worth taking a long look at in the late rounds, but could be a tweener as he lacks the athletic ability for tackle and might be too tall for guard. Despite those concerns, he is still worth taking a shot on in the late rounds as a developmental prospect.

#21 Chris Scott, Tennessee • Height: 6'5 • Weight: 328 • 40 Time: 5.35

Scott played overweight last season but checked in at the combine 10 lbs lighter. Is a versatile player that can play all 5 positions and can develop into a solid player at the next level.

#22 Adam Ulatoski, Texas • Height: 6'6 • Weight: 310 • 40 Time: 5.25

Good body length but has limited versatility and struggled with speed rushers. Played on the left side in college but will probably move to the right side in the pros.

#23 Derek Hardman, Eastern Kentucky • Height: 6'5 • Weight: 304 • 40 Time: 5.25

Doesn't possess good length. Shows good technique in zone blocking schemes. Will need some seasoning and good coaching to develop into a reliable starter.

#24 Kevin Haslam, Rutgers • Height: 6'5 • Weight: 304 • 40 Time: 5.30

Has nice feet and is very athletic. Will need to improve his overall strength and play with more attitude by using his hands to get a good punch on defenders.

#25 Dennis Landolt, Penn St • Height: 6'4 • Weight: 305 • 40 Time: 5.25

Played two years at right tackle before moving to the left side. There are questions about his size, which may see him move to guard. Does a nice job with angles and is versatile.

Strengths: Outstanding size for a guard with the length to perhaps play tackle in the NFL. Moves very well and has great strength. Physical player with a violent punch. Athletic enough to get to the second level and plays very hard.

Weaknesses: His biggest weakness is the fact that he is a grabber instead of a puncher and thus has holding calls against him often. Needs to also be more consistent.

Overall: Highly athletic guard that could kick out to tackle and play four positions on the line. Has great upside and could be the best guard to come out in years. This two-time All-WAC selection was impressive at the Senior Bowl and should land in the top 20 picks.

Weaknesses: Needs to be more consistent as he did not always dominate. Raw in his technique. Has not played football as long as many others so he still has a lot to learn.

Overall: Two-time first-team All-CAA selection and 2009 All-American that could be a solid guard from day one because of his run blocking ability and could perhaps develop into a tackle. Despite the fact he is a project his physical tools and upside make him a solid second round type prospect that could possibly be reached on in the late first round.

Weaknesses: Sometimes allows defenders to get under his pads at times when blocking on the move. Needs to improve his awareness. Needs to be more consistent keeping his feet through trash.

Overall: Three-year starter, two-time All-Big Ten selection that has great size and solid run blocking skills. Moves well enough and has long enough arms to perhaps be a tackle but appears better suited for guard. Should come off the board in the top 100 selections.

Weaknesses: Needs to get stronger in the lower body, struggles against powerful bull rushes by tackles. Needs to add bulk. Doesn't dominate downfield. Marginal hand placement.

Overall: Has had a roller coaster of a career as a former tight end who plays guard and fullback and even some special teams. He was an All-SEC selection in 2007 before missing the 2008 season due to an academic suspension. Has great strength and plays with great tenacity and could land in the middle rounds.

Strengths: Good initial surge into his man extending his arms to get a maximum push. Seals the edge well. Has the feet and strength to effectively trap and pull. Has a guard build. Has strength to turn ends in either direction. Effective blocking down on tackle then getting to the linebacker. Durable player that flashes nastiness on the field. Has good genes.

Weaknesses: May lack the lateral quickness to play on the edge. Not explosive in his kick-slide. Not experienced at pulling and trapping.

Overall: Has the arm and hand size to possibly try left tackle in the NFL but his strength and ability to handle all assignments show his versatility and could allow him to land in the middle to late rounds.

OFFENSIVE GUARDS RANKINGS

#8 Zane Beadles Utah

Height: 6'4 • Weight: 307

40 Time: 5.25

Strengths: Has a quick set and solid footwork. Smooth lateral movement. Gets low to cut block defenders he can't reach. Good enough with his kick-slide off the snap to prevent quick pass rushers from turning the corner. Reaches defenders in space.

Weaknesses: Inconsistent with his punches. Sometimes gets knocked back by a strong punch but recovers to anchor. Just average foot quickness moving down the line. Not fluid running to cut off linebackers. Inconsistent to move feet to stay on his man.

Overall: Three-time All-Mountain West selection that has played left tackle and left guard. Durable three-year starter that is loved by coaches because of his attitude and work ethic in practice. Likely a better guard at the next level because he lacks the height and athletic build that left tackles possess.

Strengths: Has outstanding size. Sets quickly in pass protection. Delivers a strong punch and plays with a good base. Excellent anchor that is able to turn his man out of the hole and use defender's momentum to take him out of plays. Flexible for his size. Better than you would expect at getting to linebackers. Gets good contact when he cut blocks. Team captain that plays through the whistle. Takes good angles and is very competitive on the field.

Weaknesses: Slow to cut block. Lumbers a bit when trapping. Lunges too often to reach his man from his deep stance. Was suspended one game in 2009 for violating team rules. Lacks the footwork to mirror and sustain.

Overall: Size and footwork made him one of the more dominant players in the Big 12. Good run blocker that adjusts well and has good strength. Could go as high as the 4th round but his off field incident could keep him out of the draft.

2008	46	10	10	0	0
2009	64	10.5	14.5	2	0
TTL	138	29.5	25.5	3	0

Strengths: He is a relentless pass rusher with good strength and power. Plays with natural leverage and shows a good motor. He is also a strong, physical tackler and is tenacious and disruptive.

Weaknesses: His height will hurt him. He also has short arms and sometimes lets blockers get to his body. Sometimes late off the ball and not a fluid mover.

Overall: Had a very productive career at Michigan with 29.5 career sacks and 25.5 tfl. His MVP performance at the Senior Bowl likely vaulted him from a second to first round projection, but some teams might grade him as an outside linebacker instead of end due to his lack of ideal height.

2008	51	7	2.5	3	0
2009	55	12.5	6	1	0
TTLS	115	19.5	10	5	0

Strengths: Has decent size and brings a good motor and energy to the field. He also shows a good initial burst off the snap and an explosive first step. He also has nice lateral agility and balance which make him solid in the run game. He also shows good body control and is a reliable wrap-up tackler.

Weaknesses: Lacks creativity in his pass rush needing to add more moves to his game. Sometimes a step late and arrives at the quarterback's feet. Struggled against Iowa OT Bryan Bulaga showing that he can be handled by top competition. Will need some work as he is not ready to be a top player in the NFL yet.

Overall: Morgan's junior season was one of the best in all of college football as he produced 55 tackles and 12.5 sacks. He showed a strong, relentless type of game and brings good size and high potential to give him one of the biggest upsides of any player in this draft. He is a definite first round selection.

2008			Fort Scott CC		
2009	45	6.5	10	3	1
TTLS	45	6.5	10	3	1

Strengths: He has great size, good speed, long arms, and is explosive. His burst, balance, and hip flexibility make him very tough to block off the edge. He explodes from his stances and is a drag-down tackler who uses hustle and length to his advantage.

Weaknesses: Just a half-year starter that is very raw and needs a lot of work on his pass rush moves. He struggles to turn the corner against better linemen and lacks functional strength to hold against NFL tackles.

Overall: Pierre-Paul is the ultimate boom or bust prospect as a one year wonder who transferred from Fort Scott CC and had 45 tackles, 10 tfl, and 6.5 sacks in 2009. His production and upside could potentially make him the first end off the board but we downgrade him slightly due to the fact that he is nowhere near the safest pick of the top rated ends.

2008	39	9.5	4	1	0
2009	38	9	1.5	6	0
TTLS	84	19.5	6.5	8	0

Strengths: Dunlap has freakish measurables and is extremely fast for his size. His body length is exceptional and he has fluid movement skills. His production was highly impressive his last two seasons with 18.5 sacks during that time. He also closes quickly to the ball and can split through double teams.

Weaknesses: Must work on his hand use and his initial quickness is just adequate. Plays too upright. Does have off field concerns as he was arrested and charged with a DUI and was suspended for the SEC title game.

Overall: His measurables and upside are quite rare and his production is impressive but he will need some coaching and his arrest could also make some teams hesitant at the top of round one. Don't be shocked if someone takes a chance on this high upside prospect in the first round though.

Everson Griffen

Height: 6'3 • Weight: 270

40 Time: 4.66

CAREER STATISTICS

Year	Tkls	Sks	Tfl	Pbu	Int

2008	18	4.5	1.5	0	0
2009	45	8	1.5	1	0
TTLS	84	18	3	3	0

Strengths: Productive player with good size, strong upper body, and a wide frame. His first step is explosive and he tackles with force. He also possesses good balance and has the agility to break down in space.

Weaknesses: Inconsistent playing with leverage and his weight-room strength does not really translate to the field. He has the bulk and strength to hold up at the point, but is often pushed back. Neither his rip or swim moves are NFL caliber.

Overall: Griffen is coming off a productive career at USC where he finished his junior season with 45 tackles and 8 sacks. His quickness and size make him a solid top 100 selection but he has yet to live up to the enormous hype he brought coming out of high school. It will likely take a couple of years for him to become a force and his arrest in July of 2009 is an issue that teams will likely consider on draft day as well.

2008	52	15	4.5	1	2
2009	58	11.5	5	3	0
TTLS	142	28.5	12	4	3

Strengths: He shows a great burst with a first step explosion and has good instincts. He is also an explosive tackler and plays with a fiery passion. His attitude, quickness, and ability to break down in space and take good angles makes him one of the best tweeners to come out in a while.

Weaknesses: Undersized with thin ankles and wide hips. Lacks bulk strength to anchor against the run and handle the double team. He uses too much finesse and does not play with a lot of power. Needs to develop some more pass rush moves.

Overall: Hughes was one of the top players in all of college football over the last two years and concluded his career with 28.5 sacks as he burst onto the NFL radar. He is a tweener that could possibly fit as a DE or OLB at the next level depending on the scheme. While he has some limitations against the run his pass rush ability will be highly coveted and should attract a team to take a shot at him in the late first or early to mid second round.

2008	42	10	6	2	1
2009	21	4	2	0	0
TTLS	156	19.5	18.5	8	4

Strengths: Has great size, long arms and a huge wingspan and shows the ability to shed and anchor against the run. Before his injury he showed that he can flatten the line and close to the ball. He is also quick off the snap and plays tall on the edge.

Weaknesses: His knee injury in 2008, which hampered him as a senior is a huge concern. He also needs to add bulk to his frame. When he slants and twists he often gets carried out of the play or grounded.

Overall: Had his best season in 2008 but struggled in 2009 playing on a knee that was far from 100 percent. Has height, length, and pass rush ability but needs to bulk up and also show that he can return to his 2008 form. Someone will take a chance on him in the second or third round area because of his upside.

TTLS	146	21.5	19	4	1

Strengths: Carrington has great size and looks the part. He also possesses good base strength and flashes power. Did not participate in a full workout at the combine but showed good upper body strength with 26 reps on the bench. He also closes quickly and holds up at the point of attack.

Weaknesses: Marginal initial quickness off the snap and has average instincts. Does not play with much fire and his weight room strength does not always translate to the field.

Overall: He played well at the Senior Bowl after a standout two-year stint at ASU in which he produced 19.5 sacks and 14 tfl over that time. His size and production make him an intriguing prospect and could potentially fit in a 4-3 or 3-4 scheme. He will likely come off the board in the top 100 selections.

Strengths: Has good size, long arms, and a rangy build. Quick hands to shed blocks and flashes an explosive burst off the snap. He also has good balance and flexibility to get under and around the tackle. Good burst to accelerate as he changes direction.

Weaknesses: Marginal strength for the bull rush. Relies on quickness to move laterally to control the edge. Washed down often when the ball is ran at him. Has been benched before. There are concerns over his durability.

Overall: Young entered college with high expectations and while he got off to a slow start as a freshman he was highly productive his last three years and showed good quickness and pass rush ability. His size, quickness off the edge and production make him a solid 3rd-5th round prospect.

Strengths: Has the strength to hold at the edge and move laterally. Productive senior season. Explosive tackler that hustles and has good quickness off the snap. Uses his low center of gravity and excellent upper and lower body strength to push the pocket.

Weaknesses: Needs to work on consistently shedding blocks. Lacks elite change of direction agility on the outside for his size. Does not play with elite strength.

Overall: Had his coming out party nationally in the Texas vs. Nation Game with five tackles and two sacks to earn MVP honors. He also showed he could move very well for his size in workouts and has moved into the mid round range.

2009	64	11	8.5	2	1
TTLS	209	29	24.5	6	1

Strengths: Lane is a highly productive and long limbed athlete that is quick off the snap and shows effective pass rush moves such as his spin move. He is quick enough to beat the tackle outside to seal the edge against the run. Rare measurables for the position.

Weaknesses: Very raw pass rusher that needs to improve his strength at the point of attack. The run game is his biggest weakness. Lacks upper body strength, which is shown heavily in his bull rush.

Overall: Lane held his own at the Senior Bowl coming off a 2009 season that saw him earn All-America and OVC Defensive Player of the Year honors. His 4.84 40-yard dash time at the NFL Scouting Combine must be improved at his pro day or else he could fall to the 5th or 6th round. However if he runs in the 4.7s or better you can expect someone to overdraft him on potential and possibly take him in the top 100 selections.

Strengths: He can provide pass rush from either side of the line due to his size and length. Plays stronger than you would expect. Shows good backfield awareness.

Weaknesses: He has limited career experience and instincts. Also needs to improve his strength at the point of attack. Struggles to shed blocks.

Overall: Witten's stock has risen some since the season as a potential top 100 selection due to his late blooming from the late round projection he had during the season. His lack of toughness, instincts, and physicality could scare some teams away though and we could see him go anywhere from around the late 3rd to 5th rounds.

TTLS	228	29	40	8	0

Strengths: He is quick off the edge and has an explosive first step. Good body control and balance and anticipates the snap well. Can change direction well and causes a lot of fumbles.

Weaknesses: Lacks the strength to anchor and shed blocks in the NFL and needs to gain weight. Does not use his hands well to shed. Must develop more pass rush moves.

Overall: Selvie started his career as one of the best players in America posting 17 tfl and 14.5 sacks as a sophomore. It was believed that he would be a first round selection heading into his junior season but his numbers have decreased each season since. His size and production should land him in the mid to late rounds but it is far off from where most felt he would go early on in his career.

2008	50	10	8.5	3	0
2009	32	9.5	3	3	0
TTLS	132	23.5	19	7	3

Strengths: Has good height and length. Could potentially play in either a 3-4 or 4-3 scheme. Shows good athletic ability, foot quickness, and lateral range.

Weaknesses: Needs to bulk up and really could have used one more year in school. Needs to work on use of hands and is too often caught and knocked off his feet.

Overall: Basped decided to declare after an impressive junior season but really could have used another year to hone his skills and show that he will not be a one-year wonder. Because of his size and production alone he would warrant late round consideration, but could potentially go in the top four rounds because of his upside.

2008	52	6	4	4	0
2009	34	7	5	0	0
TTLS	152	19.5	14.5	7	1

Strengths: He has good quickness and burst off the snap and shows strong hands. He has good balance and flexibility and is athletic enough to drop back into coverage. Closes well and has good lateral agility to control the edge.

Weaknesses: He has bulked up some since the season, which he needed to. Now he needs to show the same speed and quickness at that heavier weight. He does not bend naturally and struggles some in transition. Sometimes misses open field tackles and he lacks functional lower body base strength to hold at the point of attack.

Overall: Cunningham is a three-year starter on what was one of the best defenses in the nation and finished his career with 152 tkls, 19.5 sks and 14.5 tfl. His production, size, athletic ability, and the fact he could drop into coverage makes him a prospect at end and possibly as a rush linebacker. Because he is injured and has yet to workout for teams he could fall on draft day but should fall no further than the 4th round.

2008	18	8.5	1	1	1
2009	16	5	1.5	3	0
TTLS	147	26.5	13	10	1

Strengths: Good athlete that brings great size and the ability to bend off the edge and close to the ball. He is able to shed blocks to defend the run and has pass rush ability. He uses leverage well to protect his legs and maintain balance.

Weaknesses: He has had a lot of injuries in his career and been somewhat of a problem off the field showing poor work habits and perhaps an ego. Plays very hot and cold producing well at times and then disappearing.

Overall: Has seen his stock plummet since the beginning of the season as he appeared to be a potential top 10 selection. His immaturity, questionable toughness, and poor work habits have been a huge reason his stock has fallen. His falloff in production didn't help either. Hardy now appears to be a 3rd-6th round type prospect and it would not be shocking to see him fall completely off the board but you still have to rank him among the top ends in the country because of his raw talent.

Strengths: Highly productive player with speed off the edge and displays quick, active hands. He has better strength than you would expect at his size and has good lateral agility. Hustles both laterally and downfield. Plays with a good pad level and is a good catch and drag down tackler.

Weaknesses: Lacks the bulk to play every down and has just average straight line speed. Makes a lot of plays because of hustle and not athletic ability. Lacks ideal physical tools for the NFL and is considered an overachiever on tape.

Overall: A highly productive two-time All-Pac 10 selection that was considered an overachiever. Since his solid pro day performance where he showed good explosion and speed his stock has risen from a marginal draft pick to a definite mid-late round type selection.

Weaknesses: Tight hips with just moderate speed off the edge and struggles to get the corner. Moderate straight line speed with just adequate acceleration. Struggles getting off blocks and can be walled off by double teams.

Overall: Wilson was an impact player for the Pirate defense since arriving on campus finishing his career with 27 sacks and 18.5 tfl, including 16 sks and 13 tfl in his last two seasons. Strengths: : Has outstanding size and strength to anchor and create a pile. Has the long arms and strength to be a good block shedder. Flashes a nice burst and the ability to push the pocket as a bull rusher.

Weaknesses: Very raw player that needs to work on shedding blocks. He guesses at snap counts a lot and sometimes is late. He has marginal balance and lateral agility to handle quick ball carriers. Can be evaded in tight quarters and is inconsistent in pursuit down the field.

Overall: While he possesses ideal physical tools and length this raw pass rusher really could have used another year to hone his game. For someone with his tools he has not produced as you would expect and thus will likely be drafted based on potential and upside solely. Due to his upside someone will likely take that chance in the mid-late rounds.

2008	76	7.5	11.5	3	2
2009	85	12	12	10	1
TTLS	215	24	33	15	4

Strengths: Very productive against the run with good playing strength and does a good job of shedding blocks. Flashes strength to disrupt plays in the backfield. High motor. Tough to move. Good awareness in the backfield. Excellent footwork moving down the line on stretch plays. Good initial quickness off the snap.

Weaknesses: Comes off the ball too high at times losing his anchor. Other than consistency in his technique and continuing to develop pass rush moves there are not many negatives here.

Overall: Suh is one of the best tackles to come out in recent memory and it showed with his speed, quickness, and production throughout the 2009 season. His athletic ability also allows him to possibly play in the 3-4 or 4-3. Expect him to come off the board in the top 3 picks and be an instant Pro Bowler in the NFL.

2009	34	6	9.5	2	0
TTL	83	14.5	18.5	4	1

Strengths: Has great size and power. Shocks with his punch and jolts defenders. Good use of hands. Plays hard with a very good motor. Great balance and quick to shed blocks. Wears down opponents with his tenacity.

Weaknesses: Not much along weaknesses here except that double teams wash him down the line sometimes. Needs to be more consistent with leverage and technique.

Overall: McCoy's quickness, strength, and ability to blow up plays in the backfield make him a potential Pro Bowl player. He has great upside and his instincts will allow him to be a strong force while he still develops his technique. Expect him to come off the board in the top five picks.

2008	41	4.5	5	3	0
2009	43	7	4	1	0
TTL	104	13.5	11	5	0

Strengths: Great size for the position and great athlete for his size. Good hip flexibility. Strong moves. Attracts a lot of double teams. Good motor. Flattens the line and makes plays on the perimeter. Good tackler. Hard worker. Tough kid that plays through injuries. Good quickness and pop off the snap.

Weaknesses: Struggles to hold at the point of attack. Needs to get stronger in the lower body. Struggles to consistently break down in space due to his height. Needs to be more aware of protecting his knees when cut blocked.

Overall: Earned All-American honors in 2009 after totaling 43 tackles and 11 sacks in his best year of his career. Could be a three-technique in a 4-3 defense. Likely a top 50 selection.

2008	35	4.5	9.5	1	1
2009	48	7	16.5	1	0
TTLS	97	12.5	32	3	1

Strengths: Highly productive player with a quick initial burst and good speed. Tough to move off the line of scrimmage. Creates a pile in the middle and can make plays without making a tackle. Anchors well against double teams. Very explosive.

Weaknesses: Lacks ideal height for the position. Dumpy-looking physique. Needs to lose weight. Often wears down and plays down to the level of competition. Lacks the strength to hold at the point of attack.

Overall: Three-time All-Pac 10 selection that has first round talent but concerns over his size could see him slip to the 2nd or 3rd round. However, his ability to wreak havoc could have some suitors looking at him in the later portion of round one.

2008	34	1	2.5	0	0
2009	23	0	2.5	0	0
TTLS	83	3.5	5.5	0	0

Strengths: Very strong kid that rarely gets knocked off the ball. Able to split double teams. Thick lower body and good use of leverage to anchor inside and create a pile. Has the strength to drive blockers into the pocket.

Weaknesses: Must improve his use of hands and add more moves to his repertoire. Lacks the body control or technique to wrap up in the open field. Marginal stat production.

Overall: Had just 23 tackles and 2.5 tfl in 2009, but his talent suggests that he could potentially be a highly productive player. Athletic player that has added to his value since the Senior Bowl. Likely a nose guard in a 3-4 defense. Should come off the board in the 2nd or 3rd round.

2009	70	2.5	6.5	0	0
TTLS	160	7	18	1	0

Strengths: Big body that moves well and is light on his feet for his size. Very active reading screens and chasing. Locates the ball quickly. Good initial burst off the snap. Very strong. Good use of hands and upper body strength.

Weaknesses: Lacks the upper body strength and needs to work on using his hands to shed blocks as he sometimes stays tied up in them too long. Gets worn down late in games. Must work on conditioning. Concerns over weight fluctuation.

Overall: Would likely be a first round pick if not for the depth at this position but his production as a senior (70 tkl, 6.5 tfl and 3.5 sks) and his size likely won't allow him to fall past the second round.

2009	35	5.5	6	0	0
TTLS	99	13	13	2	0

Strengths: Great strength, well put together, and moves well. Holds his ground. Has good closing speed. Good lateral movement to sidestep into the gap after the snap. One of the strongest players in the draft shown with his 31 reps at the combine.

Weaknesses: Injury concerns are a major red flag. Inconsistent motor and effort. Plays lazy at times. Questionable mental toughness. Gets stood up and knocked off the ball and washed against double teams.

Overall: Neal had a breakout junior campaign and then followed it up with a productive All-Big Ten performance as a senior with 35 tackles, 6 tfl, and 5.5 sacks. His injury history is a concern and could see him drop on draft day but if healthy he is a top 100 selection.

2008	62	6	5	2	0
2009	65	7.5	4	3	0
TTLS	195	16	10	6	1

Strengths: Had an impressive combine showing adequate strength (24 reps), good change of direction (7.15 3-cone, 4.28 short shuttle), and explosion (9'8 broad jump). Shows good striking ability and plays with natural leverage. Also shows a good motor and runs to the ball.

Weaknesses: Lacks elite lower body explosion and quick twitch. Needs to develop more counter moves. His spin move is slow to develop. Lacks the flexibility coaches look for to break down in space.

Overall: Three-year starter that had a highly productive senior season with 65 tackles and 7.5 sacks. Mostly played the five technique at Cal, but is most likely going to play in a 4-3 defense as a three technique. Likely going in the top 100 selections.

2008	24	0.5	4	0	0
2009	28	0	6	1	0
TTLS	52	0.5	10	1	0

Strengths: Big bodied plugger with rare size and long arms. Gets a good push into the backfield. Rarely moved off the line of scrimmage. Best in short-yardage situations. Good on special teams because he can knock the long snapper back and create havoc.

Weaknesses: Not as strong in the bench press (22 reps) as expected. Has weight concerns despite showing that he can lose some weight since the season. Many teams are worried he will gain back the weight before training camp. Marginal closing speed and no pass rush moves. Must develop better technique and work on shedding blocks.

Overall: Cody transferred from Mississippi Gulf Coast Junior College and has been a dominant force over the last two years. His girth makes him almost impossible to move and an ideal clogger in a 3-4 defense. A 3-4 team is likely to take a chance on him in the 2nd or 3rd round.

2009	36	3	7.5	0	0
TTLS	120	11	22	2	0

Strengths: Atkins is quick, agile, and plays with good initial explosion off the snap. He can split the gap and disrupt the play. Shows a good bull rush. Moves very well for his size.

Weaknesses: Most of his weaknesses have to do with his size as he is undersized, has short arms, and lacks ideal bulk. Can struggle to shed blocks once blockers get their hands on him. Needs to work on conditioning.

Overall: Had a solid senior season with 36 tackles, 7.5 tfl and 3 sacks and followed that up with an impressive week at the Senior Bowl. His quickness and agility make him an ideal 3rd round prospect to take a chance on and develop into a starter.

2008	22	1.5	5.5	5	0
2009	68	8	14	4	0
TTLS	170	15	28	13	0

Strengths: Very agile for a 300-plus pounder with a good motor. He is quick and active and makes a lot of plays on hustle and effort between the tackles. Has long arms with strong hands and good upper body strength (30 reps).

Weaknesses: Lacks elite first-step quickness and can be washed down by double teams. Too easily walled off and controlled if he does not win the battle with quickness. Not an explosive tackler.

Overall: Houston was up and down during his career but put it all together as a senior with 68 tackles, 14 tfl and 8 sacks. His performance at the Senior Bowl also helped his stock. Because the tackle class is deep he could possibly slip past the second round but would be a bargain at any point after the top 50 selections.

Jeffrey Owens

Georgia

Height: 6'1 • Weight: 304

40 Time: 4.99

Strengths: Can hold the point of attack and flashes the ability to defeat double teams. Good natural upper body strength and when playing with good pad level is able to anchor vs tandem blocks.

Weaknesses: Needs to work on pass rush technique and has injury concerns due to a torn ACL in 2008. Marginal athlete that does not redirect well and has been characterized as lazy and an underachiever.

Overall: His medical history could make it hard for him to be taken in the top 100 picks like he would have been before his ACL injury. He lacks the size and athletic ability to be taken early on but should land in the mid rounds.

Linval Joseph

East Carolina

Height: 6'6 • Weight: 322

40 Time: 5.09

Strengths: Has the size of a nose guard but plays like an ideal three technique. Athletic and strong with good body length. He flashes the ability to anchor against the double team. Has good character and is a player who has upside, which he showed during his career by improving each season.

Weaknesses: Very raw player that must play with more consistent leverage and hand use. Also needs to work on taking on cut blocks and is a player that does not deliver much pop to his opponent with his hands. Doesn't play as strong as you would expect.

Overall: : Joseph didn't do much his first two years but had a terrific junior season with 60 tackles, 10 tfl and three sacks. He could have really moved up the board with one more year of development but has potential to be a starter over time. Likely a mid round selection that will take a couple of years before he is ready to contribute as a starter.

Torell Troup

UCF

Height: 6'2 • Weight: 310

40 Time: 5.3

Strengths: Very strong upper body. Tough to move off the line and can hold the point against double teams. Good bull rusher who can push a single block to collapse the pocket using leverage. Able to rip off blocks as well as punch or swim over the top. Quick and powerful off the snap. Good balance after initial contact.

Weaknesses: Limited burst and needs to work on disengaging from blockers. Has limited lateral agility and marginal pass-rush ability. Must be meaner and improve on avoiding and recovering from cut blocks.

Overall: His size, strength, and motor are something that will attract teams in the mid rounds and could potentially become a starter with time. Likely 3rd-5th round selection.

2009	51	3.5	2	0	0
TTLS	196	12	11.5	4	1

Strengths: Good athlete with good quickness to pressure the pocket and has flexible hips. He stays on his feet through traffic and is a versatile athlete that has lined up at every position. Been very durable as he has not missed any time to injury. Has active feet and good lateral agility.

Weaknesses: Needs to add more pass rush moves and some question the level of competition he has faced in the WAC. Lacks functional strength to anchor against the double teams. Uses too much finesse. Also needs to work on shedding blocks quicker.

Overall: Many expected him to post impressive numbers at the combine, but he chose not to workout. His stock has dropped some this postseason as many considered him a likely top 75 selection at one point but he appears to be a mid round prospect now.

2009	48	6.5	6	1	0
TTLS	88	8	10	2	0

Strengths: Quick, active hands. Has a burst to close and flashes some pop when given space to gain momentum. Gives good effort. Could contribute on both sides of the ball.

Weaknesses: Lacks ideal size. Relies too much on a marginally effective bull rush and gets tired too quickly. Likely never going to be a run stuffer so he would be a two down player. Struggles to change directions and is too often eluded for someone his size.

Overall: A former fullback who has good athletic ability and moves very well for his size. His performance at the East-West Shrine Game helped his stock as he showed that he could potentially be a solid three technique and will even have some teams grading him as a fullback. Should land in the mid rounds.

2009	66	6.5	7.5	2	2
TTLS	193	13.5	14.5	2	3

Strengths: Highly athletic kid with good strength. Likely a 3-technique at the next level because he lacks the bulk to play the nose. Moves well for his size. Good use of hands. Plays with good leverage. Adequate quickness. Uses a nice spin move in his pass rush. Does a good job of pushing the pocket.

Weaknesses: Raw pass rusher that is inconsistent. Needs to develop more moves and perhaps still bulk up some. Also needs to show he can dominant.

Overall: Lissemore has risen up the board as of late, especially after his pro day in which he displayed great explosiveness and athleticism. Before this many teams were trying to sneak and take him as a free agent but that is not going to happen now. This 2009 first-team All-CAA selection had 7.5 tfl and 6.5 sacks as a senior and is rising up the board. He could potentially go as high as the 5th or 6th round after his workouts.

Strengths: Has a good initial burst to slip through gaps and create havoc. Active feet and good acceleration through the gap and has a late burst to close. He also has good strength to slide off blocks and take down the runner.

Weaknesses: Lacks the ideal height teams look for and lacks the bulk and strength to hold up consistently against double teams. A project that will likely take two or three years before he is ready to heavily contribute.

Overall: A one year wonder that will likely drop due to concerns over why he only had one good year of production. Likely going to be a three technique in a 4-3 alignment and will go somewhere in the 5th-7th round range.

Strengths: Has great size and moves very well for that size. He is also strong and powerful and can control blockers. Able to handle double teams and maintain his gap. Could be a solid one gap player at the next level.

Weaknesses: Woods needs to develop a mean streak and work on his quickness and change of direction ability. Just a one-year starter so it will likely take time for him to tap his potential. Heavy-footed and not very quick-twitched.

Overall: Started just one year and had marginal production. He is a big, powerful, and long armed one technique kid who has potential but likely will take time before he is ready to start. Could come off the board in the 3rd round or could potentially fall to the 5th-6th round range.

2009	56	4	8	5	0
TTLS	153	11.5	16.5	11	1

Strengths: He has good size with a thick trunk and shows good smarts. Uses his explosive initial burst off the snap and closing speed to pressure the pocket. Can slide off the block and make a tackle. Has good character. Good hand strength and quickness to tug and rip the defender.

Weaknesses: Comes off the ball too high sometimes and often uses a simple bull rush. Does not generate enough power and has marginal stamina.

Overall: Had a nice senior season with 56 tackles, 8 tfl and 4 sacks. Has good size and is a developmental prospect that likely would be a backup early in his career. Because of the depth in this year's class he is unlikely to go before the 5th or 6th round.
